The Blind Spot English Edition:

The Blind Spot Adam Frank, Marcelo Gleiser, Evan Thompson, 2024-03-19 A compelling argument for including the human perspective within science and for how human experience makes science possible This is by far the best book I've read this year Michael Pollan Professor of the Practice of Non fiction Harvard University 1 New York Times bestselling author A stimulating manifesto for changing the way we look at things Wall Street Journal It's tempting to think that science gives us a God's eye view of reality But we neglect the place of human experience at our peril In *The Blind Spot* astrophysicist Adam Frank theoretical physicist Marcelo Gleiser and philosopher Evan Thompson call for a revolutionary scientific worldview where science includes rather than ignores or tries not to see humanity's lived experience as an inescapable part of our search for objective truth The authors present science not as discovering an absolute reality but rather as a highly refined constantly evolving form of human experience They urge practitioners to reframe how science works for the sake of our future in the face of the planetary climate crisis and increasing science denialism Since the dawn of the Enlightenment humanity has looked to science to tell us who we are where we come from and where we're going but we've gotten stuck thinking we can know the universe from outside our position in it When we try to understand reality only through external physical things imagined from this outside position we lose sight of the necessity of experience This is the Blind Spot which the authors show lies behind our scientific conundrums about time and the origin of the universe quantum physics life AI and the mind consciousness and Earth as a planetary system The authors propose an alternative vision scientific knowledge is a self-correcting narrative made from the world and our experience of it evolving together To finally see the Blind Spot is to awaken from a delusion of absolute knowledge and to see how reality and experience intertwine *The Blind Spot* goes where no science book goes urging us to create a new scientific culture that views ourselves both as an expression of nature and as a source of nature's self-understanding so that humanity can flourish in the new millennium *Blind Spot* Myriam Tadessé, 2021-12-01 In *Blind Spot* Myriam Tadessé exposes the difficulty even the impossibility for France to truly understand and celebrate the lived realities of mixed or biracial French citizens What the French word *metis* which translates to half-breed or mixed race hides is how central the notion of race actually is in a society that claims to repudiate it The French film and theatre world in which Tadessé has made her career appears unable to confront the individuality of the performers They are required to correspond to categories often based on race that don't allow for biracial identities This classification not only contradicts France's asserted ideals but also views as anomalies those who defy ethno-racial assumptions Drawing on her personal experiences as a biracial Ethiopian French woman and her family history Tadessé explores the realities of life for mixed-race individuals in France through her searing and honest memoir Praise for *Blind Spot* Myriam Tadessé's memoir combines formal innovation with a candid look back on her life and the harrowing experiences she's had with discrimination in her chosen field and in French society as a whole *Blind Spot* feels like a distillation of its author's life and a powerful

testament to her day to day reality Tobias Carroll Words Without Borders *The Blind Spot* Jean-Yves Girard, 2011 These lectures on logic more specifically proof theory are basically intended for postgraduate students and researchers in logic The question at stake is the nature of mathematical knowledge and the difference between a question and an answer i.e the implicit and the explicit The problem is delicate mathematically and philosophically as well the relation between a question and its answer is a sort of equality where one side is more equal than the other one thus discovers essentialist blind spots Starting with Godel's paradox 1931 so to speak the incompleteness of answers with respect to questions the book proceeds with paradigms inherited from Gentzen's cut elimination 1935 Various settings are studied sequent calculus natural deduction lambda calculi category theoretic composition up to geometry of interaction GoI all devoted to explication which eventually amounts to inverting an operator in a von Neumann algebra Mathematical language is usually described as referring to a preexisting reality Logical operations can be given an alternative procedural meaning typically the operators involved in GoI are invertible not because they are constructed according to the book but because logical rules are those ensuring invertibility Similarly the durability of truth should not be taken for granted one should distinguish between imperfect perennial and perfect modes The procedural explanation of the infinite thus identifies it with the unfinished i.e the perennial But is perennality perennial This questioning yields a possible logical explanation for algorithmic complexity This highly original course on logic by one of the world's leading proof theorists challenges mathematicians computer scientists physicists and philosophers to rethink their views and concepts on the nature of mathematical knowledge in an exceptionally profound way Blind-Spot Politics Paul Lendvai, 2025-10-09 Putin has obviously deceived everyone These were the words of Manuela Schwesig First Minister of the German state Mecklenburg Western Pomerania after the 2022 full scale invasion of Ukraine She was trying to explain why her federal government had been so closely implicated in Russia's controversial completion of the Nord Stream 2 gas pipeline Why have other German Austrian and European politicians and commentators so often got it so very wrong in their assessments of Moscow policy Why has the EU been so slow to recognise the danger posed to its liberal values by nationalist autocrats such as Viktor Orbán of Hungary And why have lessons from past blunders in Western policy particularly in the Balkans and the example of German Ostpolitik gone ignored until it was too late Paul Lendvai a veteran reporter on the continent's centre and east exposes the role of double standards embraced blind eyes turned and human and political weakness overlooked in policies of appeasement towards Europe's authoritarian regimes past and present Combining analysis of new developments with decades of personal experience as a correspondent he provides fascinating political profiles in deceit sketching both the victims and the perpetrators of political fraud in Central and Eastern Europe *Refresh the Book*, 2021-04-26 Refresh the Book contains reflections on the multimodal nature of the book focusing on its changing perception functions forms and potential in the digital age Offering an overview of key concepts and approaches such as liberature technotexts and bookishness this volume of essays addresses the specificity of the printed

book as a complex cultural phenomenon It discusses diverse forms of representation and expression both in literary and non literary texts as well as in artist s books Of special interest are these aspects of the book which resist remediation into the digital form Finally the volume contains an extensive section devoted to artistic practice as research discussing the book as the synthesis of the arts and site for performative aesthetic activity Christin Barbarino Katarzyna Bazarnik Christoph Bl si Sarah Bodman Zenon Fajfer Annette Gilbert Susanne Gramatzki Mareike Herbstreit Viola Hildebrand Schat Thomas Hvid Kromann Monika J ger Eva Linhart Bettina Lockemann Patrizia Meinert Bernhard Metz Sebastian Schmideler Monika Schmitz Emans Christoph Benjamin Schulz usus Uta Schneider Ulrike Stoltz Anne Thurmann Jajes Sakine Weikert Gabriele Wix

Theology, Ethics, and Technology in the Work of Jacques Ellul and Paul Virilio Michael Morelli, 2021-06-17 Theology Ethics and Technology in the Work of Jacques Ellul and Paul Virilio examines biographical and textual connections between sociologist theologian Jacques Ellul and philosopher phenomenologist Paul Virilio Through an examination of their embeddedness in the socio historical context of postwar France Michael Morelli identifies a relationship between these critics of technology that bears the marks of a nascent theological tradition He shows from various vantage points how Ellul and Virilio s nascent tradition exposes technology as modernity s primary idol and how these thinkers use multiple disciplines including history sociology philosophy phenomenology theology and ethics to resist the perilous consequences of the modern world s worship of power and the kinds of technologies this misdirected worship produces Jacques Ellul s death in 1994 and Paul Virilio s death in 2018 may have prevented the maturation of this nascent theological tradition but this book will aid in this tradition s ripening through the presentation of an illuminating way to read these two unique prophetic intellectuals

interpretation and virtual reality gaming practices The book aims to provide a comprehensive understanding of the role of different media in constituting meaning and shaping social interactions Jean-Francois Lyotard Jean-Francois Lyotard, 2025-10-02 With contributions selected from the last fifteen years of his life this second volume of Jean Francois Lyotard s interviews and debates includes hard to find and previously untranslated material Taking place between 1984 and 1997 they follow in the wake of Lyotard s most notable publications including The Postmodern Condition 1979 and The Differend 1983 Whilst continuing to contest and reconfigure the claims of these writings Lyotard and his interlocutors help to contextualise the questions raised within the fields of art philosophy literature and politics Discussions in Paris and London include contributions from thinkers such as Philippe Lacoue Labarthe Christine Buci Glucksmann and Alain Badiou whilst significant interviews elsewhere in Europe North and South America elucidate the consequences of the varied reception given to his work The importance of Kant Freud and Wittgenstein is readily apparent as are the themes now closely associated with Lyotard the inhuman infancy and resistance to the system These interviews and debates record an evident delight in the activity of thinking which is not about rhetorical flourish or rehashing staid assumptions but of grappling with some of the most important questions confronting thought today
