Manufacturing -- What Went Right, What Went Wrong Richard J. Schonberger, 2018-11-12 This book tells 101 stories of company efforts to implement the many aspects of flow manufacturing including such topics as just in time production total quality control reorganization of factories into product focused or customer focused cells plants in a plant material flows by the simplicity of visual kanban supplier partnerships quick setup of equipment cross training and job rotation of the work force and many more The 101 mini case studies dubbed caselets include 26 non U S companies from 12 countries and cover a wide swath of industrial sectors and include many well known corporations such as Apple Campbell Soup Honeywell and Boeing From the 1980s to the present the author has been taking the message of process improvement and customer focused excellence far and wide Most of these travels usually in connection with delivering a seminar include brief factory tours in which he compiled detailed notes and then organized them as brief reports his unvarnished analysis or take on what they do well and what needs improvement In the main the reports were then sent back to the hosts of the plant tour These factory tours and these follow up reports form the basis of the large majority of this book s caselets Many of the caselets bring to life process improvement methodologies in detail With lots of caselets to draw from the readers will find vivid examples of similar companies and processes within their respective industries For example the caselets often include applications of advanced concepts in cost management employee training performance management supply chains and logistics as well as applications of plant layout quick setup material handling quality assurance scheduling ergonomics and flow analysis The Industrial Geography of Italy Russell King, 2015-03-27 At the time this book was originally published in 1985 Italy was one of Europe s leading industrial nations This volume provides a comprehensive overview of Italian industry during the 1980s It introduces Italy s physical and human resources and outlines the historical development of the industry It then examines the major sectors of Italian industry and then describes the different regions of the country and the striking differences between them are explored and discussed **The Engineer** ,1977 **Index of Patents Issued from the United States Patent and Trademark Office** ,1993 **Business Review** ,1985-07 The Future of Eco-labelling Frieder Rubik, Paolo Frankl, 2017-09-29 Eco labelling is one of the key tools used by policy makers in many parts of the world to encourage more sustainable production and consumption By providing environmental information on products and services eco labels address both business users and consumers and range from mandatory approaches such as required product declarations to voluntary approaches such as national eco labels Eco labels can play an important role in environmental policy They reward and promote environmentally superior goods and services and offer information on quality and performance with respect to issues such as health and energy consumption Eco labels fit well into a multi stakeholder policy framework as promulgated recently by the EU s integrated product policy IPP since the development of criteria for labels and the acceptance in the market requires the involvement of a wide range of different parties from government and business to consumers and environmental organisations However many eco labelling schemes have had troubled histories and questions have been

raised about their effectiveness So are eco labels an effective tool to foster the development production sale and use of products and to provide consumers with good information about the environmental impacts of those products Is eco labelling useful to business as a marketing tool What factors contribute to the development of successful schemes More than ten years after its establishment can the EU Flower be considered a success Are national eco labels such as the German Blue Angel and the Norwegian White Swan more effective Should eco labels be harmonised Are eco labels achieving their original aim of fostering sustainable production and consumption For which product groups are ISO type I eco labels appropriate and inappropriate Are other labels such as mandatory ISO type II and ISO type III labels more effective in some cases Are eco labels focusing on the main environmental policy targets or just on low hanging fruit Are eco labels really linked to other tools of IPP The Future of Eco labelling provides answers to all of these questions Based on a major EU research exercise the book plots a course for policy makers to address some of the historic problems with eco labelling to learn what works and what doesn t and to move forward with schemes that can make a real difference to sustainable production and consumption The book analyses the conditions under which eco labelling schemes both mandatory and voluntary are or can become an efficient and effective tool to achieve given objectives assesses previous experiences with eco labels in different European countries and the relationship of these schemes with business strategies IPP and market conditions defines strategies aimed at linking eco labels with other IPP measures explores how eco labels can be used to encourage sustainable consumption patterns create green markets foster innovation and development of green products and services and implement multi stakeholder initiatives and sets out detailed recommendations for the future of eco labelling The book will be required reading for policy makers businesses involved with eco labelling schemes and researchers interested in the development of sustainable production and consumption and IPP worldwide
