Using Fim Scores For G Codes:

R.E.P.S. Reid Elam, 2020-03-26 The term reps is commonly used in the exercise realm as a shortened version of repetitions or the number of times a particular movement is performed for any particular time segment The title REPS makes reference to the aforementioned and serves as the acronym for the title in its entirety Rehabilitation Exercise Progression System In any professional setting where rehabilitation is performed medicine sports schools and fitness personal training a system for prescribing and administering rehabilitation exercise is necessary in order to provide the best outcomes for patients and or clients Once a condition is identified it can be challenging to determine where to start and what to prescribe Certain factors such as the individual characteristics and level of conditioning of the patient client must be considered The scope and purpose for making choices in a rehabilitation exercise regimen must be based on a foundation of movement that is naturally human Next selection of appropriate exercises and a plan for progression to attain rehabilitation goals both personal and clinical need to be implemented This book takes into account all these factors and presents a comprehensive rehabilitation system with progressions to take the guesswork out of the equation for achieving outstanding results for the busy practitioner
