STUDENT HANDBOOK VERSION 4.1 With Block 1 & 2 Student Outlines And Visual Presentations** , Over 2 300  
total pages OVERVIEW Tactical Combat Casualty Care TCCC was developed to emphasize the need for continued  
improvement in combat pre hospital care The Committee on Tactical Combat Casualty Care CoTCCC was established in 2001  
and is part of the Defense Health Board CoTCCC is a standing multi service committee charged with monitoring medical  
developments in regards to practice technology pharmacology and doctrine New concepts in hemorrhage control airway  
management fluid resuscitation analgesia antibiotics and other lifesaving techniques are important steps in providing the  
best possible care for our Marines and Sailors in combat The TCCC guidelines are published every 4 years in the Prehospital  
Trauma Life Support manual It has been recognized that TCCC guidelines and curriculum will need to change more often  
than the 4 year cycle of the PHTLS textbook publication The National Association of Emergency Medical Technicians NAEMT  
will include the updated TCCC guidelines and curriculum on its website as they are approved as a way to help get this new  
information out to the combat medical personnel in the military that need it **PRINCIPLES OF TACTICAL COMBAT CASUALTY  
CARE TCCC** The principles of Tactical Combat Casualty Care are fundamentally different from those of traditional civilian  
trauma care where most medical providers and medics train These differences are based on both the unique patterns and  
types of wounds that are suffered in combat and the tactical conditions medical personnel face in combat Unique combat  
wounds and tactical conditions make it difficult to determine which intervention to perform at what time Besides addressing

a casualty's medical condition responding medical personnel must also address the tactical problems faced while providing care in combat. A medically correct intervention at the wrong time may lead to further casualties. Put another way, good medicine may be a bad tactical decision which can get the rescuer and the casualty killed. To successfully navigate these issues, medical providers must have skills and training oriented to combat trauma care as opposed to civilian trauma care. The specifics of casualty care in the tactical setting will depend on the tactical situation, the injuries sustained by the casualty, the knowledge and skills of the first responder, and the medical equipment at hand. In contrast to a hospital Emergency Department setting where the patient IS the mission, on the battlefield care of casualties sustained is only PART of the mission. TCCC recognizes this fact and structures its guidelines to accomplish three primary goals: 1. Treat the casualty 2. Prevent additional casualties 3. Complete the mission. In thinking about the management of combat casualties, it is helpful to divide care into three distinct phases, each with its own characteristics and limitations.
