MotorBoating ,2002-06 **Inventions of Nemesis** Douglas Mao,2020-11-10 Examining utopian writings and other texts that focus on ideal societies from Greek antiquity to the present this book offers a fresh take on utopian thought Mao begins with the observation that utopian ideas often are propelled by an angry conviction that society is badly arranged In an introduction and three long chapters he argues that utopia s most basic aim has not been to secure happiness material welfare or even order but instead to establish justice understood as a condition of right arrangement in which all receive what they ought to receive Mao s analysis grounded in literary studies encompasses a broad range of literary and non literary works from canonical utopian writings Plato s Republic More s Utopia Bellamy s Looking Backward to a broad range of other works including novels and philosophical writings from Europe and the United States It considers utopia in relation to the goal of justice examining at length the question of utopian indignation and situates utopian imagining in relation to human migration across national boundaries In the author s view a rethinking of key assumptions about utopian ideas is important at a time when public interest in utopia is high and when questions about what an ideal society could mean have never been more searching

Participatory Design Douglas Schuler,Aki Namioka,2017-12-14 The voices in this collection are primarily those of researchers and developers concerned with bringing knowledge of technological possibilities to bear on informed and effective system design Their efforts are distinguished from many previous writings on system development by their central and abiding reliance on direct and continuous interaction with those who are the ultimate arbiters of system adequacy namely those who will use the technology in their everyday lives and work A key issue throughout is the question of who does what to whom whose interests are at stake who initiates action and for what reason who defines the problem and who decides that there is one The papers presented follow in the footsteps of a small but growing international community of scholars and practitioners of participatory systems design Many of the original European perspectives are represented here as well as some new and distinctively American approaches The collection is characterized by a rich and diverse set of perspectives and experiences that despite their differences share a distinctive spirit and direction a more humane creative and effective relationship between those involved in technology s design and use and between technology and the human activities that motivate the

Nelson, 1998-04-15 Talk is of central importance to politics of almost every kind it is no accident that when the ancient Greeks first attempted to examine politics systematically they developed the study of rhetoric In Tropes of Politics John Nelson applies rhetorical analysis first to political theory and then to politics in practice He offers a full and deep critical examination of political science and political theory as fields of study and then undertakes a series of creative examinations of political rhetoric including a deconstruction of deliberation and debate by the U S Senate prior to the Gulf War Using the neglected arts of argument refined by the rhetoric of inquiry Nelson traces how everyday words like consent and debate construct politics in much the same way that poets such as Mamet and Shakespeare construct plays and he shows how we are remaking our politics even as we speak Tropes of Politics explores how politicians take stands and political scientists probe representation how experts become informed even as citizens become authorities how students actually reinvent government while professors merely model politics how senators wage war yet keep comity among themselves The action Nelson shows is in the tropes these figures of speech and images of deed can persuade us to turn from ideologies like liberalism toward spectacles about democracy or movements into environmentalism and feminism His argument is that inventive attention to tropes can mean better participation in politics And the argument is in the tropes evidence itself as sights or citations governments as machines or men politics as hardball or softball deliberations as freedoms or constraints borders as fringes or friends **Catalogue of the free public library, Sydney, 1876. The Politics of International Law Martti Koskenniemi, 2011-06-10 Today international law is everywhere Wars are fought and opposed in its name It is invoked to claim rights and to challenge them to indict or support political leaders to distribute resources and to expand or limit the powers of domestic and international institutions International law is part of the way political and economic power is used critiqued and sometimes limited Despite its claim for neutrality and impartiality it is implicit in what is just as well as what is unjust in the world To understand its operation requires shedding its ideological spell and examining it with a cold eye Who are its winners and who are its losers How if at all can it be used to make a better or a less unjust world In this collection of essays Professor Martti Koskenniemi a well known practitioner and a leading theorist and historian of international law examines the recent debates on humanitarian intervention collective security protection of human rights and the fight

Beyond Objecthood James Voorhies, 2017-02-24 The rise of the exhibition as critical form and artistic medium from Robert Smithson's antimodernist non sites in 1968 to today's institutional gravitation toward the participatory In 1968 Robert Smithson reacted to Michael Fried's influential essay Art and Objecthood with a series of works called non sites While Fried described the spectator's connection with a work of art as a momentary visual engagement Smithson's non sites asked spectators to do something more to take time looking walking seeing reading and thinking about the combination of objects images and texts installed in a gallery In Beyond Objecthood James Voorhies traces a genealogy of spectatorship through the rise of the exhibition as a critical form and artistic medium Artists like Smithson Group Material and Michael Asher sought to reconfigure and expand the exhibition and the museum into something more active open and democratic by inviting spectators into new and unexpected encounters with works of art and institutions This practice was sharply critical of the ingrained characteristics long associated with art institutions and conventional exhibition making and yet Voorhies finds over time the critique has been diluted by efforts of the very institutions that now gravitate to the participatory Beyond Objecthood focuses on innovative figures artworks and institutions that pioneered the exhibition as a critical form tracing its evolution through the activities of curator Harald Szeemann relational art and New Institutionalism Voorhies examines recent artistic and curatorial work by Liam Gillick Thomas Hirschhorn Carsten Holler Maria Lind Apollonia Uterzi and others at such institutions as Documenta e flux Manifesta and Office for Contemporary Art Norway and he considers the continued potential of the exhibition as a critical form in a time when the differences between art and entertainment increasingly blur
