Water Management in Megacities Cecilia Tortajada, Olli Varis, Asit K. Biswas, Jan Lundqvist, 2013-09-13 Efficient and equitable water, wastewater and stormwater management for the megacities is becoming an increasingly complex task. The special issue will focus on water management in its totality for megacities, including their technical, social, economic, legal, institutional and environmental dimensions, through a series of specially invited case studies from different megacities of the world. At present, around one out of two of the earth's 6.3 billion people live in urban areas. Each year, the world population grows by around 80 millions. Practically all of this growth is urban, primarily due to migration. World's urban population is expected to reach 5 billion by 2030, which is nearly 2.3rd more than in 2000 and would mean that 60% of world's population will live in urban areas. The case studies analysed include some of the most interesting and challenging megacities of this planet: Dhaka, Istanbul, Jakarta, Johannesburg, Mexico City, Riyadh and São Paulo. They assess different aspects of how water is intermingled in the overall development milieu. The special issue will consider the magnitudes, nature and extent of the present and future challenges and how these could be met in socially acceptable and cost-effective ways. The contributors are all acknowledged water experts from different parts of the world. This book was previously published as a special issue of the *International Journal of Water Resources Development*. **Social Constructions of Water Quality in South Africa**

Suvania Naidoo, 2022-05-04 This book details how the water quality of the Blesbokspruit River in Gauteng, South Africa, was socially constructed by stakeholders and key individuals in the context of acid mine drainage (AMD) and its treatment. Social constructionism is used as the framing for this research to explain how water is intrinsically social. Findings presented here show that stakeholders are aware that the changes in the physicality of the Blesbokspruit resulted from human interventions and varied uses of the water over the years. Such knowledge among factors such as the historical context of mining, current coal mining flows and volumes of water technology used and processes followed, information and communication and vested interests influence social constructions of the water quality. What counts as the truth about water varies depending on the

individual's perspective their purpose and their individual interests Further how one defines water quality influences what treatment processes are preferred in order to improve water quality The book explains why for example a treatment process meant to improve water quality gained a bad reputation by the public because of the South African government's silo approach The book explains how these social constructions are entrenched in power relations between stakeholders regarding AMD treatment and illustrates how power was used to influence decisions to improve the water quality of the Blesbokspruit The case presented in this book offers insights and recommendations for policymakers working in water governance including means to influence social constructions of water quality and ways to clarify roles and responsibilities in pursuit of improved cooperative government

Krienitz, 2018-12-31 This book provides insights into the fascinating life of the Lesser Flamingo *Phoeniconaias minor* and describes how this enigmatic bird has adapted to the extreme conditions of tropical soda lakes and can even withstand the caustic effects of brine. However, humans are increasingly disrupting the natural cycles of these wetlands and for these pink birds characteristic of these salt lakes it is becoming more and more difficult to find suitable habitats, food and breeding grounds. Their fate is considered a cautionary example of man's dealings with nature. Will the Lesser Flamingo survive in a man-made world? Flamingos are considered to be an embodiment of the Phoenix and the author interweaves his personal experiences with and observations of the flamingos' unusual habitats with the Phoenix motif in order to stimulate reflection on the circle of life. Written in an accessible style that combines science, biological information and the author's own travels and fieldwork, the book also includes a wealth of captivating images. As such, it offers a unique resource for biologists and nature-loving Africa and Asia enthusiasts alike.

Forging Solidarity Astrid von Kotze, Shirley Walters, 2017-04-13 Animating this book is a twofold question: In what ways are adult and popular educators responding to various harsh economic, political, cultural and environmental conditions? In doing so, are they planting seeds of hope for and imaginings of alternative futures which can connect individuals and communities locally and globally to achieve economic, ecological and social justice? The book illustrates how transformative politics of solidarity often involve actors across vastly different backgrounds. Solidarity is therefore a political relationship that is forged through particular struggles situated in place and time across power differentials. The authors put popular education to work by describing and analysing their strategies and approaches. They do so using accessible language and engaging styles. Popular education is a medium for dreaming, for imagining other futures. It is also essential for countering the wilful spreading of fake news and propagation of ignorance. Pedagogies of solidarity are necessary to building connections amongst people at a time when competitive individualism and alienation are rampant. Forging solidarity with and amongst communities is a means towards that end and indeed an end in itself. Corporate mines and agribusiness poison the water we drink, the air we breathe and the food we eat. Together with their political proxies they destroy the earth and her peoples; too many are killed because of their military, economic, religious and information wars. How do we stand up for ourselves and the earth that nourishes us against this global system? *Forging Solidarity* shares inspiring stories that feed our deep connection and power.

Pregs Govender, Author of *Love and Courage: A Story of Insubordination*

Forging Solidarity is a critical and timely collective intervention that ponders, probes and plays in the most generative ways. In so doing, it invites us to continue deepening our engagements with questions of responsibility and justice in relation to education everywhere.

Richa Nagar, author of *Muddying the Waters*, Co-authoring *Feminisms across Scholarship and*

Activism This book inspires people to realize that not fighting against socio economic injustices is to side with oppressors
