

How to Use the Vaccine Resource Hub

Under **Find Resources**, use the **Discover** tab to view **Trending Topics** relevant to current areas of interest or **Most Frequently Downloaded Resources** to see what others find most useful on the Hub.

Use the **Search All** tab to filter and search for a variety of resources ranging from **Factsheets** with information about diseases and vaccines to **Toolkits** for managing social media or increasing vaccine uptake in different populations. The Search tab uses a tag system to categorize resources and can be used to narrow down your search. Select one or multiple tags to find a resource that fits what you are looking for. Then download or follow the link in the description to use a resource from the Hub.

The **Collections** tab includes talking points to address common vaccine concerns, learning materials curated in “roadmaps” on various topics such as vaccine safety, and external resource links to other websites with related content such as additional resource hubs, educational content, data resources, and communication tools.

To see what topics the Vaccine Resource Hub covers, visit the **By Topic** tab. Topics correspond to tags on the hub.

What types of resources are available on the Hub?

/ **Outreach** resources are materials, such as social media graphics and videos, that organizations can share with the public to improve vaccine confidence and educate their communities about immunization. Resources come in a variety of languages and sizes and are free to download and share.

/ **Capacity Building** resources can be used to support the training, development, and enhancement of skills and knowledge so that organizations and staff can perform at their highest level when implementing immunization programs.

Tips to Maximize Your Vaccine Resource Hub Experience

“I am looking for social media graphics and videos that I can post to our organization’s website/Instagram/Facebook/WhatsApp.”

Using the Search filters in the lefthand navigation ribbon under the **Search All** tab, select the **Graphic/Image** or **Video** resource format tags and the **Social Media** resource type tag to find

 Madden,2022-01-12 As teachers and parents we often hear that children are the best scientists Great science teachers tune
 in to children s interests and observations to create engaging and effective lessons This focus on the innate curiosity of
 children or humans overall is celebrated and used to justify and support efforts around STEM teaching and learning Yet
 when we discuss elementary school teachers we often hear many inside and outside the classroom report that these teachers
 dislike fear and feel uncomfortable with science This is exactly the opposite approach from what is universally recommended

 Omer,2018-10-27 This book provides clinicians and their staff with essential information on the vaccines that are
 recommended and not recommended for their patients the diseases these vaccines prevent and a broad range of potential
 vaccine safety issues that may be brought up by their patients Each topic from specific vaccines to safety concerns is covered
 succinctly based upon systematic reviews of the scientific literature with talking points to be used with patients The

organization of the information makes it easy to reference specific topics and quickly find pertinent information with the most practical details such as recommendations and causality conclusions highlighted at the very beginning of the respective sections There are also sections outlining the vaccine safety system and evidence based strategies for how to talk with patients about vaccines This book aims to improve the efficiency and effectiveness of clinical vaccine discussions with patients leading to more informed patients and timely vaccination This is an ideal resource for all clinicians administering vaccines and their healthcare teams

Building public confidence in innovative mRNA vaccines Jia Hu, Kenneth Rabin, Cora Constantinescu, Heidi Larson, Scott Ratzan, 2025-05-09 The COVID 19 pandemic was devastating causing global loss of life and morbidity However there was a silver lining as the development of mRNA vaccines was found to be safe and effective Despite this success the public still has many concerns about mRNA vaccines and more work is needed to increase the public's confidence in this relatively new technology Vaccine confidence within communities leads to more vaccinations Therefore increasing confidence in mRNA technology could be the key to improving vaccination rates While healthcare and public health organizations are commonly involved in vaccine promotion a crisis like the COVID 19 pandemic requires a more holistic approach that incorporates vulnerable communities employment settings places of worship and other trusted sources in promoting vaccinations and reducing the spread and impact of COVID 19 Engaging trusted leaders in non healthcare settings may be the key to increasing confidence in mRNA technology and improving the low rate of COVID 19 vaccine uptake These non traditional settings may help improve communication and vaccine literacy surrounding COVID 19 mRNA vaccines and other innovative platforms while also improving access to vaccines by meeting people where they are It is clear that different communities face different rates of COVID 19 and hospitalization Therefore developing tailored approaches to engage these communities could aid in mitigating the impact of COVID 19 The goal of this Research Topic is to publish a collection of data driven research articles that focus on strategies to engage different populations in vaccine education to increase vaccine confidence and vaccine uptake This Research Topic welcomes but is not limited to submissions of Original Research Review Mini Review Systematic Review General Commentary and Brief Research Report articles pertaining to the following subtopics Approaches to engage non traditional settings in vaccine education Implementation and evaluation of interventions to increase vaccine uptake outside of health care and public health settings Public health and economic consequences of public engagement with non healthcare settings for vaccine education Developing a systematic diagnostic tool for COVID 19 risk in non healthcare settings Empirical research on vaccine education among specific populations such as immunocompromised groups and across different employment sectors Approaches for supporting the public with COVID 19 risk assessments Strategies and initiatives aimed at combating vaccine hesitancy among employees and staff Dr Heidi Larson receives research grants from GSK Moderna and Merck related to the the topic Jia Hu at 19 to Zero has received funding from Moderna Pfizer Sanofi Merck GSK Medicago within the past year related to the topic The other Topic Editors
