Validating Clinical Trial Data Reporting With Sas:

Validating Clinical Trial Data Reporting with SAS Carol I. Matthews, Brian C. Shilling, 2008 This indispensable guide focuses on validating programs written to support the clinical trial process from after the data collection stage to generating reports and submitting data and output to the Food and Drug Administration

Validating Clinical Trial Data Reporting with SAS (Hardcover Edition) Carol I. Matthews, Brian C. Shilling, 2008-03-17 Validation is a critical component to programming clinical trial analysis Essential to effective validation is the programmer's understanding of the data with which they'll be working If you don't understand how the data is arranged the values that are reasonable for each variable and the way the data should behave you cannot ensure that the final result of your programming effort is complete or even appropriate Therefore to be a successful programmer in the pharmaceutical industry you need to understand validation requirements and to learn how to make the code do the bulk of the work so that your programs are efficient as well as accurate This indispensable guide focuses on validating programs written to support the clinical trial process from after the data collection stage to generating reports and submitting data and output to the Food and Drug Administration FDA Authors Carol Matthews and Brian Shilling provide practical examples explanations for why different techniques are helpful and tips for avoiding errors in your output Topics addressed include Validation and pharmaceutical industry overviews Documentation and maintenance requirements discussions General techniques to facilitate validation Data importing and exporting Common data types Reporting and statistics

Validating Clinical Trial Data Reporting with SAS is designed for SAS programmers who are new to the pharmaceutical industry as well as for those seeking a good foundation for validation in the SAS programming arena Readers should have a working knowledge of Base SAS and a basic understanding of programming tasks in the pharmaceutical industry
