Using Corpora In Discourse Analysis Paul Baker:

Using Corpora in Discourse Analysis Paul Baker, 2006-06-23 Paul Baker examines approaches to carrying out discourse analysis using techniques that are grounded in corpus linguistics. He looks at a number of methodologies including collocations, keyness, concordances and dispersion plots and illustrates them with real life examples. **Using Corpora in Discourse Analysis** Paul Baker, 2023-08-24 How can you carry out discourse analysis using corpus linguistics? What research questions should I ask? Which methods should you use and when? What is a collocational network or a key cluster? Introducing the major techniques, methods and tools for corpus assisted analysis of discourse, this book answers these questions and more, showing readers how to best use corpora in their analyses of discourse. Using carefully tailored case studies, each chapter is devoted to a central technique including frequency concordancing and keywords, going step by step through the process of applying different analytical procedures. Introducing a wide range of different corpora from holiday brochures to political debates, the book considers the key debates and latest advances in the field. Fully revised and updated, this new edition includes a new chapter on how to conduct research projects in corpus based discourse analysis. Completely rewritten chapters on collocation and advanced techniques using a corpus of jihadist propaganda texts and covering topics such as social media and visual analysis. Coverage of major tools including CQPweb, AntConc, Sketch Engine and LancsBox. Discussion of newer techniques including the derivation of lockwords and the comparison of multiple data sets for diachronic analysis. With exercises, discussion questions and suggested further readings in each chapter, this book is an excellent guide to using corpus linguistics techniques to carry out discourse analysis. Corpus-Assisted Discourse Studies Mathew Gillings, Gerlinde Mautner, Paul Baker,2023-04-06 The breadth and spread of corpus assisted discourse studies CADS indicate its usefulness for exploring language use within a social context However its theoretical foundations limitations and epistemological implications must be considered so that we can adjust our research designs accordingly This Element offers a compact guide to which corpus linguistic tools are available and how they can contribute to finding out

more about discourse It will appeal to researchers both new and experienced within the CADS community and beyond

Using Corpora to Learn about Language and Discourse Linda Lombardo, 2009 Considerable progress has been made in the use of corpora for research purposes to describe language in use and more recently through a CADS corpus assisted discourse studies approach to identify the discourse features of specific text genres While the potential benefits of working with corpora in the classroom have been recognised there has been a lag in the promulgation of guidelines for carrying out meaningful corpus work with language learners and teachers in mind The papers in this volume aim to make a contribution toward filling that gap by providing an in depth account of innovative corpus work most of which has actually been carried out with real learners in the classroom Authors provide valuable insights into ways of structuring corpus work for specific target learners as well as suggestions for resolving problematic issues that have arisen and avoiding errors that have been made with learners and in their own research and experimentation The transparency and honesty with which they present their methodology and results along with the successful techniques they have developed constitute a step forward in defining good and bad practice in the use of corpora in learning

Corpora and Discourse Studies Anthony McEnery, Paul Baker, 2015-07-21 This edited collection brings together contemporary research that uses corpus linguistics to carry out discourse analysis The book takes an inclusive view of the meaning of discourse covering different text types or modes of language including discourse as both social practice and as ideology or representation
