in sustainability initiatives **Recent Advancement in White Biotechnology Through Fungi** Ajar Nath Yadav, Sangram Singh, Shashank Mishra, Arti Gupta, 2019-04-24 White biotechnology is industrial biotechnology dealing with various biotech products through applications of microbes. The main application of white biotechnology is commercial production of various useful organic substances such as acetic acid, citric acid, acetone, glycerine etc. and antibiotics like penicillin, streptomycin, mitomycin etc. and value added product through the use of microorganisms especially fungi and bacteria. The value added products included bioactive compounds, secondary metabolites, pigments and industrially important enzymes for potential applications in agriculture, pharmaceuticals, medicine and allied sectors for human welfare. In the 21st century techniques were developed to harness fungi to protect human health through antibiotics, antimicrobial, immunosuppressive agents, value added products etc. which led to industrial scale production of enzymes, alkaloids, detergents, acids, biosurfactants. The first large scale industrial applications of modern biotechnology have been made in the areas of food and animal feed production, agricultural green biotechnology and pharmaceuticals, medical red biotechnology. In contrast the production of bio active compounds through fermentation or enzymatic conversion is known industrial or white biotechnology. The beneficial fungal strains may play important role in agriculture industry and the medical sectors. The beneficial fungi play a significance role in plant growth promotion and soil fertility using both direct solubilization of phosphorus, potassium and zinc, production of indole, acetic acid, gibberellic acid, cytokinin and siderophores and indirect production of hydrolytic enzymes, siderophores, ammonia, hydrogen cyanides and antibiotics. Mechanisms of plant growth promotion for sustainable agriculture. The fungal strains and their products, enzymes, bio active compounds and secondary metabolites are very useful for industry. The discovery of antibiotics is a milestone in the development of white biotechnology. Since then white biotechnology has steadily developed and now plays a key role in several industrial sectors providing both high valued nutraceuticals and pharmaceutical products. The fungal strains and bio active compounds also play important role in the environmental cleaning. This volume covers the latest research developments related to value added products in white biotechnology through fungi.

South Africa's water governance hydraulic mission (1912-2008) in a WEF-Nexus context Johann W.N.

Tempelhoff, 2018-12-01 Geologists, physicists and ecologists currently promote the idea of a post Holocene epoch, the Anthropocene. As a result of constant innovation and modernisation in the fields of engineering, natural science, management studies and environmental studies, there has been a growing awareness of the intrinsic interaction between humankind and the environment. Humankind has become part of the environmental dynamics to the extent that they are literally able to change ecosystems. Nowhere is the impact more evident than in the anthropogenic engagement with the hydrosphere, from the smallest pool of water to the earth's atmosphere. Comprehensive infrastructure development in water and sanitation, the growing trend to seek additional resources in the form of groundwater, desalinated seawater and recycled wastewater as well as special attention being given to capturing and preserving rainwater bear evidence of a timely response to climate change.

population growth and rapid development in many water stressed regions of the world The purpose of the book is to provide a historical overview of the manner in which South Africa s water resources have been governed from a time when the Union of South Africa was formed in 1910 up to 2008 a time of a growing global awareness of the potential impact that climate change may have on water resources in a key region of southern Africa notable for increasing levels of aridity and more erratic rainfall patterns This focus on the history of water affairs in South Africa makes it possible for scholars to comprehend the contemporary transitions made in the country s water governance system since the establishment in 2014 of the Department of Water and Sanitation The focus is on the Water Energy Food nexus a strategy which holistically contemplates the governance and use of water from the perspective of the interconnection between water energy and food as resources

Patriots & Parasites Dene Smuts,2016-11-01 Patriots The great experiment in catharsis that was the Truth and Reconciliation Commission The reinvigoration of racial polarisation under the Mbeki administration and the slow burn of resentment that is coming to a head among the next generation as manifested in the RhodesMustFall campaign The entrenchment of cronyism under Zuma and the fight to protect the crucial balance of accountability enshrined in the freedom of the media and the independence of the judiciary
