Corrupted Jonathan D Jansen,2023-02-01 In South African higher education the images of dysfunction are everywhere Student protests Violence Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict Corrupted takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won t be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly

Utilisation of South African Research on Higher Education Jan Botha, Gabriele Vilyte, 2021-10-26. The relationship between research on the one hand and policy practice on the other hand is complicated and collaboration between scholars in research on higher education (RHE) and institutional research (IR) practitioners is often lacking. This book marks a collaborative effort of a diverse range of South African RHE and IR scholars and asks the overarching questions: What do we know about the utilisation of South African research on higher education (SARHE) and its subset of research known as Institutional Research? How and by whom is this research used? The book begins by looking at the historical underpinnings of SARHE and delineating the shape and size of this body of research. This is followed by a series of case studies on South African Higher Education institutions and governmental bodies investigating how, when and by whom are research on higher education and institutional research used in the decision making of these organisations. This book is the first of its kind in South Africa and sets out to lay the groundwork for further research into the use, uptake and utilisation of RHE and IR in this country.
