Workbook , The Wise Company Ikujiro Nonaka,Hiroataka Takeuchi,2019-09-13 High velocity change is the fundamental challenge facing companies today Few companies however are prepared to continuously innovate because they focus on the short term and do not emphasize the wisdom needed to make sure that their interests are aligned with those of society Practical wisdom is the bases of continuous innovation where companies ceaselessly and repeatedly creating new knowledge

disseminating it throughout the organization and converting knowledge to action over time In The Wise Company legendary management experts Ikujiro Nonaka and Hirotaka Takeuchi highlight how various companies have confronted the challenge of rapid change to create new products and new ways of doing business that benefit employees consumers and society The key a relentless self renewal process where companies realize the future they envisions rather than only responding to changes in the environment Nonaka and Takeuchi argue that while knowledge creating companies focusing on tacit and explicit knowledge can generate innovation they cannot create it on a continuous and ongoing basis without having wisdom about human interactions and how they influence organizational structures and practices Companies that have resilience longevity and sustainability share a number of characteristics Nonaka and Takeuchi show Strategies are based on alignment of organizational and societal benefits Leaders grasp the core of any situation or problem quickly and intuitively comprehend the nature and meaning of people things and events But wise leadership is not enough wisdom must infuse the organization through informal as well as formal shared interactions and communications that focus on metaphors and stories that convey the essence and meaning of strategies and actions In short Nonaka and Takeuchi demonstrate how continuous innovation results from companies ceaselessly and repeatedly creating new knowledge disseminating knowledge throughout the organization and converting that knowledge to action The Wise Company presents a new model of knowledge creation and practice for the twenty first century

Japanese Management in Evolution Tsutomu Nakano, 2017-07-20 Japanese Management in Evolution illustrates the significant changes that have been taking place in Japanese business by focusing on emerging industries in the relatively neglected service and creative sectors as well as other key industries and to put those changes in historical perspective by providing an overview of business development since World War II By employing state of the art research techniques and unconventional innovative approaches in analysing Japanese management including network and discourse analysis ethnographic explorations and more the book reveals historical developments and in depth analyses of established and emerging composition of sectors and industries where cultural capital matters Throughout the book the common theme conveyed to readers is a consistently strong message that the change is ongoing and the evolution of management style is real in the Japanese context The book would be of great interest to researchers academics and practitioners in fields of global management international management and Asian capitalism

Human Resources Report, 2003

Between Imitation and Innovation Robert Boyer, Elsie Charron, Ulrich Jurgens, Steven Tolliday, 1998-11-19

Recent years have seen intense debates among management and academics on the rise of lean production and Japanization Some authors have stressed the universal impact of new forms of work organization and best practice while others have questioned the limits of convergence stressed the weight of national contexts or societal effects or highlighted the evolutionary effects of unpredictability in the external environment The international automobile industry has been a focus for much of this debate and this book written by a team of leading international researchers in the field uses this industry to

examine in detail the actual practice of the transfer and adaptation of productive models and the trajectories of innovation compromise and failure that can result Case studies cover in detail the Japanese transplant experience in North America and the global experience of hybrid production systems in Europe Latin America and Asia The book contributes to theoretical discussions about the transfer adaptation or convergence of productive models In particular the authors argue that direct transplantation or imitation of these models is rarely feasible or even desirable Systems cannot be transferred without being significantly reshaped Instead the book focuses on the process of hybridization the complex interaction of productive models with national and societal effects Hybridization it is argued is inevitable But this should be seen not simply as a process of compromise and retreat but also as an important dynamic of innovation and learning This book is from the French based international research network GERPISA Groupe d'étude de recherche permanent sur l'industrie et les salaires de l'automobile See related titles below [Classified Index of National Labor Relations Board Decisions and Related Court Decisions](#) ,2005
