Automated Guided Vehicle Systems Günter Ullrich, Thomas Albrecht, 2022-11-10. This professional book provides a comprehensive overview of the modern organisational tool of intralogistics: Automated Guided Vehicle Systems (AGV Systems). AGV Systems are floor-based systems that are used internally inside and/or outside of buildings. Since the mid-1990s, AGV Systems have successfully penetrated almost all sectors of industry and many public areas such as hospitals. The technological standards of all AGV-relevant components and functions are explained, and numerous practical examples (e.g. from the automotive, electrical, and food industries) are presented. Another focus is the practical planning of such intralogistics systems based on the VDI guidelines, including hints and tips for successful project management when introducing an AGV System.
