Advanced Structural Materials Winston O. Soboyejo, T.S. Srivatsan, 2006-12-21 A snapshot of the central ideas used to control fracture properties of engineered structural metallic materials *Advanced Structural Materials Properties Design Optimization and Applications* illustrates the critical role that advanced structural metallic materials play in aerospace biomedical automotive sporting goods and other industries *Multifunctional Lightweight Structures* Lothar Kroll, 2023-03-28

This book presents key research findings on the combination of different technologies that promise to be particularly sustainable and broadly impactful in their application The findings were compiled during the course of the first funding period for the MERGE Cluster of Excellence New methods potential solutions and exemplary pilot applications take center stage as the text explores the next generation of functional integration via lightweight structures The underlying manufacturing processes are based on textile polymer and metal processing techniques all of which are suitable for large batch production flexibility and reproducibility *Heliport Design Guide* United States. Federal Aviation Agency. Airports Service, 1964

Technologies for economical and functional lightweight design Klaus Dröder, Thomas Vietor, 2019-03-25 This book comprises the proceedings of the conference Faszination Hybrider Leichtbau 2018 which took place in Wolfsburg The conference focused on new methods and technologies for the development and production of multifunctional and hybrid lightweight solutions in large scale vehicle manufacturing Further it promoted the exchange of insights and lessons learned between experts from industry and academia Lightweight design and construction are key technologies for the development of sustainable and resource efficient mobility concepts Material hybrid structures which combine the advantages of different materials e.g. fiber reinforced plastics and metals have a high potential for reducing weight while simultaneously expanding component functionality However the efficient use of functional integrated hybrid structures in vehicle construction requires innovations and constant developments in vehicle and production technology There is a great demand for affordable lightweight construction in mass production that takes into account the increasing requirements in terms of variant diversity safety and quality particularly with regards to new methods and technologies
