A Successful Transformation? Petr Pavlínek,2008-04-30 I started researching the dramatic changes in the automobile industry of Central and East European countries in the late 1990s My interest grew out of my previous work on the post socialist transformation foreign direct investment and regional economic development While researching the economic and regional development effects of foreign direct investment I was increasingly drawn to the automobile industry because of the speed and depth of its transformation through foreign direct investment and its potentially very significant economic and regional development effects In addition to working on the Central and East European automobile industry as a whole I became interested in detailed case studies of enterprise restructuring as I wanted to understand its complex nature and the role of different actors in the restructuring of the automobile industry In order to achieve this goal I visited dozens of automotive enterprises especially in the Czech Republic Czechia to conduct in depths interviews with key informants I have also interviewed key informants at ministries automotive

associations and academia and collected various secondary data and information This book is the outcome of this work In this endeavor I have benefited from various support The University Committee on Research and Creative Activity at the University of Nebraska at Omaha funded three field work sessions in Czechia to conduct interviews and research for this book

Dependent Growth: Foreign Investment and the Development of the Automotive Industry in East-Central Europe Petr Pavlínek,2017-04-07 This book offers a critical analysis of recent developments in the automotive industry of East Central Europe ECE Economists industry specialists and national governments have considered the rapid development of the automotive industry in ECE in the past twenty years an unqualified success This rapid growth has been based on large inflows of foreign direct investment FDI from Western Europe North America Japan and South Korea and it significantly contributed to GDP growth created thousands of new jobs and completely transformed the previously existing automotive industry in the region This volume offers an analysis that goes beyond uncritical celebratory accounts of this rapid growth It is based on original detailed firm level research conducted by the author in Czechia and Slovakia between 2009 and 2015 that covered assembly firms and the networks of component suppliers Theoretically and conceptually the analysis will draw on the global production networks and global value chains perspectives Drawing on the original empirical data and on additional available information this volume concentrates on several important questions related to the development of the automotive industry in ECE in the 2000s The role of FDI in the rapid development of the automotive industry after 1990 and particularly in the 2000s The upgrading of the automotive industry in East Central Europe through FDI The position of ECE in the automotive industry research and development R D The effects of the 2008 2009 economic crisis in the automotive industry of ECE The role of state in the rapid development of the automotive industry in ECE in the 1990s and 2000s The effects of FDI on domestic firms in the form of linkages between foreign owned and domestic firms and spillovers from foreign owned to domestic firms

Electric Vehicles Joao Vitor Fernandes Serra,2013-03-01 Modern electric vehicles EVs are well suited to most people s general transport needs Despite this their adoption at a large scale has been grindingly slow What are the reasons for this Unlike most books which focus on

the technical aspects of EV performance this guide sets out the commercial and political barriers to their increased use and lays out the ways in which these barriers can be overcome It begins by charting the rise of the internal combustion engine and detailing the problems associated with it which are driving efforts to electrify transportation It goes on to introduce readers to the main EV technologies and examines the key issue of energy storage and recharging infrastructure The remaining chapters explore the cost effectiveness of electric mobility the differing adoption trajectories by which EVs may come to increase in prominence and the way in which policy can be tailored to encourage this rise The book covers industrialized and emerging economy contexts the latter of which have the greatest opportunities and most urgent need to take the EV development route Requiring no specialist engineering knowledge to understand and written in an engaging accessible style this is a valuable primer and resource for people in business policy or study who are keen to understand encourage and capitalize on the transition to electric mobility
