Schiff, 2020-07-23 In *Bureaucracy's Masters and Minions: The Politics of Controlling the U S Bureaucracy* the author argues that political control of the bureaucracy from the president and the Congress is largely contingent on an agency's internal characteristics of workforce composition workforce responsibilities and workforce organization Through a revised principal agent framework the author explores an agent principal model to use the agent as the starting point of analysis The author tests the agent principal model across 14 years and 132 bureaus and finds that both the president and the House of Representatives exert influence over the bureaucracy but agency characteristics such as the degree of politization among the workforce the type of work the agency is engaged in and the hierarchical nature of the agency affects how agencies are controlled by their political masters In a detailed case study of one agency the U S Department of Education the author finds that education policy over a 65 year period is elite led and that that hierarchical nature of the department conditions political principals influence This book works to overcome three hurdles that have plagued bureaucratic studies the difficulty of uniform sampling across the bureaucracy the overuse of case studies and the overreliance on the principal agent theoretical approach **Teaching with Favorite Newbery Books** Lori Licciardo Musso, Lori Licciardo-Musso, 1999 Contains engaging discussion questions vocabulary builders writing prompts and great literature response activities The Whipping Boy by Sid Fleischman Jean Jamieson, 2000 New ways to teach reading writing and the love of literature *Media Bias in Presidential Election Coverage, 1948-2008* Dave D'Alessio, 2012-01-01 Accusations of partisan bias in Presidential election coverage are suspect at best and self serving at worst They are generally supported by the methodology of instance confirmation tainted by the hostile media effect and based on simplistic visions of how the news media are organized Media Bias in Presidential Election Coverage 1948 2008 by Dave D'Alessio is a revealing analysis that shows the news media have four essential natures as journalistic entities businesses political actors and property all of which can act to create news coverage biases in some cases in opposing directions By meta analyzing the results of 99 previous examinations of media coverage of Presidential elections from 1948 to 2008 D'Alessio reveals that coverage has no aggregate partisan bias either way even though there are small biases in specific realms that are generally insubstantial Furthermore while publishers used to control coverage preferences this practice has become negligible in recent years Media Bias proves that at least in terms of Presidential election coverage The New York Times is not the most liberal paper in America and the Fox News channel is substantially more conservative in news coverage than the broadcast networks Finally Media Bias in Presidential Election Coverage 1948 2008 predicts that no amount of evidence will cause political candidates to cease complaining about bias because such accusations have both strategic potential in campaigns and an undeniable utility in ego defense *Monteverdi*

Education and Theory Gary Thomas, 2007-04-16 This is an exceptional book and one that should be essential reading for anyone seriously thinking about educational practice for two reasons First it is one of the few books on thinking about education which is written with the wit and humour which makes compulsive reading Second the approach to theory or thinking systematically philosophically and evidentially is through the author's own attempt to understand what appears to many as a mystery In this personal journey the author provides a comprehensive and critical review of different theoretical positions Professor Richard Pring University of Oxford What is the role of theory in education Does the pursuit of theory in education always lead to improvements in practice What is the alternative to theory Theory holds a central place in educational inquiry tutors urge students to embed their work in it funding bodies demand that research proposals be located in But in an important new analysis Gary Thomas suggests that the pursuit of theory in education is the pursuit of a chimera This compelling book examines what theory means for both student and researcher and questions whether the confidence in educational theory is justified It begins by looking at what theory is and what use it has in education and examines some theoretically significant influences on educational thought and practice in the twentieth century Challenging the idea that the practice of education should be based on theory the author offers alternative simpler frameworks for conducting inquiry without the constraints of existing theory contending that it is time for a discussion about how values evidence and ideas can more straightforwardly guide educational practice Education and Theory is stimulating reading for academics researchers teachers and students of education

Reclaiming Participation Cynthia Peters Anderson, 2014-11-01 In an era that oscillates regularly between nihilism and the erosion of moral vision on the one hand and pseudo gnostic myths of self apotheosis on the other the classical Christian claim of human participation in the divine as the story of the transformation of human life in its physical moral spiritual and eschatological dimensions takes on radical counter cultural color It is an affirmation that offers hope and meaning for humanity secured by God's participation in human life through Jesus Christ The Christological ground of this claim is crucial to secure and animate the argument of this text The author performs in this a retrieval of the Christological vision of the unification of the divine and the human in the single subject of Jesus Christ as the programmatic center point of human transformation and participation articulated particularly by Cyril of Alexandria The patristic pattern is used as a lens through which to examine and assess modern iterations those of Karl Barth and Hans Urs von Balthasar In this the author provides a critical updating of this vital classical theme annotating a vision of divine life opened up for created participation that can foster hope in the climes of contemporary life
