Srinivasarao, Dr. B. Srikanth, Dr. S. Jayaprada, Dr. B. Sai Chandana, 2020-01-01 This textbook examines the psychology of cyber crime. It aims to be useful to both undergraduate and postgraduate students from a wide variety of disciplines including criminology, psychology, and information technology. Because of the diversity of backgrounds of potential readers, this book presumes no prior knowledge of either the psychological or technological aspects of cyber crime. Key concepts in both areas are defined as they arise in the chapters that follow. The chapters consider research that has been conducted in each area but also apply psychological theories and models to each type of cyber crime. The chapters also consider many aspects of each cyber crime.

Scams, Cons, Frauds, and Deceptions Sean Byrne, James Byrne, 2024-06-28 This unique volume presents cutting edge research on the nature and extent of a wide range of scams, cons, frauds, and deceptive activities including sextortion, the use of ransomware, phishing, identity theft, Ponzi schemes, online shopping fraud, gift card scams, and health care fraud targeting elderly victims. The contributions to this book raise and attempt to answer several intriguing questions: Why have governments in each global region failed to respond more aggressively to these crimes? What can the private sector and social media giants be doing? Can the current responses of both governments and the private sector be linked to the public's ambivalence about how to respond to these forms of offending and victimization? Does a large segment of the public admire individuals who get involved in these activities in large part due to the positive portrayal of scammers, fraudsters, and con artists in both literature and cinema? Or does the public's view of the harm caused by these scams and cons vary based on our view of who is victimized, e.g., individuals or corporations, and/or why they were chosen? Will governments as they have done in the past attempt to influence the public's views by restricting access to books and movies that focus on the latest scams, cons, and frauds taking place on line and in person via book banning and other forms of censoring? And finally, should this discussion of the influence of books and cinema on the public's views of scams, frauds, cons, and deception be broadened to include the government's ongoing attempts to censor a wide range of books and films that may influence the public's view of morality and more recently the public's view of our government due to their content? Timely and thought provoking, this book will be a key resource for researchers, scholars, and practitioners in criminology and criminal justice, sociology, law, psychology, and social work, while also appealing to interdisciplinary researchers seeking insight into the relationship between positive portrayals of scammers, fraudsters, and con artists in literature and cinema and the public's perception of individuals who get involved in these activities. It was originally published as a special issue of *Victims Offenders*.

Cyber Frauds, Scams and their Victims Mark Button, Cassandra Cross, 2017-07-14 Crime is undergoing a metamorphosis. The online technological revolution has created new opportunities for a wide variety of crimes which can be perpetrated on an industrial scale, and crimes traditionally committed in an offline environment are increasingly being transitioned to an online environment.
