

## NOW YOU ARE READY TO FLY!

If you have successfully synced your Sky Raider™ to your controller as explained on page 4 you are now ready to fly. Before beginning to fly your drone you should familiarize yourself with how the controls work so please carefully read and familiarize yourself with various control features explain in the next two pages. Once again as a beginner pilot you should learn how to control your drone in a large open field or park on a day with zero or very light wind. Do not try to fly your Sky Raider™ too high until you become a more experienced pilot.

### RECOGNIZING THE FRONT & BACK OF THE SKY RAIDER™

Even though the Sky Raider™ has four rotors there is still a front or "forward" facing direction and "back" or "backward" facing direction. The forward front and forward facing direction of the Sky Raider™ is the side with two gray blades (see diagram 4.1). The rear and back of the Quadcopter is the side with two black propellers (see diagram 4.2).

**NOTE:** The front of the Quadcopter also displays WHITE LED light and the back of the Quadcopter displays RED LED lights.

### SPEED SELECT BUTTON

The Sky Raider™ has 2 speed settings: SLOW and HIGH. The Default setting when you first turn on your Sky Raider™ is the SLOW speed mode. To increase the speed simply press the Speed setting button (see remote diagram on pg 3) you will hear 2 beeps and the speed changed to HIGH speed. Speed settings can be set before flight or during the flight.

### REVERSE BUTTON

The Sky Raider™ has an REVERSE feature which allows you to operate your drone fly backward automatically. Simply press the REVERSE button and your Sky Raider™ will begin fly backward. To exit the reverse mode simply press the REVERSE button again or push the direction-control stick to any direction.

### HEADLESS MODE BUTTON

You can maintain orientation of your Sky Raider™ during flight.

1. Once the Sky Raider™ is activated press the headless mode button (see controller on pg 3) to activate the internal compass.
2. The flying orientation is now locked to match the direction control lever.

**Note:** Before switch to "Headless Mode", you need place the drone straight ahead right in front of you. Calibrate it first then press the headless mode button.

## FLIGHT CONTROL

Below is a list of basic flight functions for your long range remote to control the Sky Raider™. While learning to fly your Sky Raider™ it is best to start in a large space until you get used to the basic controls. As you master flying your Sky Raider™ you can move to more advanced maneuvering techniques. Practice makes perfect!

Move the left Throttle stick up to increase the propeller speed and the Sky Raider™ will accelerate and ascend.

Move the left Throttle stick down to decrease the propeller speed and the Sky Raider™ will decelerate and descend (see diagram 4.3).

While in the air, move the left Throttle stick left and the Sky Raider™ will rotate left.

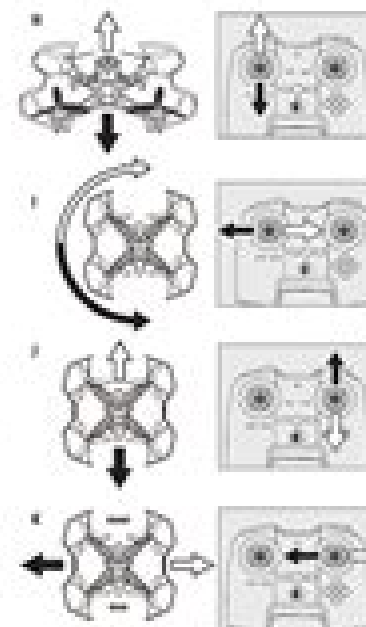

Move the left Throttle stick right and the Sky Raider™ will rotate right (see diagram 4.4).

While in the air, move the right Direction Stick up and the Sky Raider™ will move forward.

Move the right Direction Control down and the Sky Raider™ will move backward (see diagram 4.5).

While in the air, move the right Direction Control left and the Sky Raider™ will bank to the left.

Move the right Direction Control right and the Sky Raider™ will bank to the right (see diagram 4.6).

## FLIGHT PRACTICE

To master flying your aircraft by practicing the maneuvers shown below. Start with simple vertical takeoffs, landings, and left/right turning and rotating. Once these are mastered move on to square and cross maneuvers. Good luck and have fun!
