David Brion Davis

Slave To Foreign Culture:

The Problem of Slavery in Western Culture David Brion Davis, 1988-10-20 Winner of several national awards including the 1967 Pulitzer Prize this classic study by David Brion Davis has given new direction to the historical and sociological research of society's attitude towards slavery Davis depicts the various ways different societies have responded to the intrinsic contradictions of slavery from antiquity to the early 1770s in order to establish the uniqueness of the abolitionists' response While slavery has always caused considerable social and psychological tension Western culture has associated it with certain religious and philosophical doctrines that gave it the highest sanction The contradiction of slavery grew more profound when it became closely linked with American colonization which had as its basic foundation the desire and opportunity to create a more perfect society Davis provides a comparative analysis of slave systems in the Old World a discussion of the early attitudes towards American slavery and a detailed exploration of the early protests against Negro bondage as well as the religious literary and philosophical developments that contributed to both sides in the controversies of the late eighteenth century This exemplary introduction to the history of slavery in Western culture presents the traditions in thought and value that gave rise to the attitudes of both abolitionists and defenders of slavery in the late eighteenth century as well as the nineteenth century

The Fantasy of Globalism John V. Waldron, 2013-12-16 For many the advent of globalization brought with it an end to the way that the world had been viewed previous to the fall of the Berlin Wall Among the many endings the one that most concerns my book is the perceived foreclosure of any alternatives to the capitalistic ideology that structures globalization Even criticisms of globalization are bounded by its limits since the critical models they use cannot conceive of a space outside its homogenizing discourse Against the final limits that shape most interpretations of globalization I show how writers on the periphery of the globalizing north through the development and deployment of neo baroque imaginings offer a different possibility to monological globalism I show that the baroque has been a way of resisting and reconfiguring the colonial gaze in Latin America since the time of the first encounter to the present

The Family System of the Paramaribo Creoles Willem F.L. Buschkens, 2014-10-22 1 1 General In this book the family life of the lower class Creole population of 1 Paramaribo will be discussed This group which will henceforward be referred to as the lower class Creoles possesses a West Indian family

CULTURE OF NAMES IN AFRICA Emma Umana Clasberry, 2012-01-12 INTRODUCTION Personal name is a vital aspect of cultural identity As a child you may have loved or hated your name But you were rarely indifferent to it What s in a name Shakespeare asked That which we call a rose by any other name would smell as sweet he explained Perhaps in England or somewhere else in Europe but not in Africa Personal names in African have meanings can affect personality hinder or enhance life initiatives They serve to establish a connection between name and cultural background and thus provide some information about cultural affinity and more such as express one s spirituality philosophy of life political or socio economic status as defined by a given ethnic cleavage African names tell stories convert abstract ideas to stories and tell story of the story about different aspects of one s life They commemorate any unusual circumstance the family or community once experienced or world event that took place around the time of a child s birth Outside a given cultural environment names boost and nurture cultural pride and identity showcase a people s appreciation of their culture and their readiness to defend and live their culture with pride and dignity Naming practices that tell histories behind the names were the norms in Nigeria Ibibio and in fact in Africa until the encroachment of two historical forces in Africans affairs Christianization and colonization more than any other forces in history shattered the connection between personal name and cultural affinity and have ever since contributed to the gradual erosion of African culture of names On the continent the combined efforts of their human agents the missionaries and British colonial personnel directly and indirectly through their policies and practices caused African Nigerians to give up their culture relevant names in favor of foreign ones Apart from direct erosion of culture of names colonial administration a term I use mostly to refer to the combined efforts of the missionaries and British colonial personnel in Nigeria abrogated many religious socio economic and political traditions which were intimately intertwined with the people s naming practices Their attempt to replace African traditions with European ones through coercing Africans to accept Western values and beliefs consequently disabled many desirable African traditional structures including authentic African naming practices and caused some to fall into disuse A third force was early European African trade Although the impact of the presence of European merchants in Nigeria was minimal in this regard some of their activities have also left a

dent on African naming practices by introducing foreign bodies into the people's names database. Even though these alien forces invaded and injected foreign values into Africa over a century ago, their impact on naming practices continues to be felt by Africans. European intrusion in relation to African naming practices did not end on the continent. The Trans Atlantic Trade on human cargo was another major historical event that did not only forcefully disconnect many Africans from their cultural root and natural habitat but also mutilated authentic African naming practices among them. Consequently, Africans in Diaspora had European names imposed upon them by their slave masters. Today many Africans on the continent and in Diaspora continue to carry names which are foreign names whose meanings they do not know; names the bearers can not even pronounce correctly in some ethnic contexts and names which have no relevance to nor any form of link with the bearers' cultural background. In effect, culture of names as many other African customary practices has lost its savor. Some peoples of African descent still cherish these colonized names. Some do not and are making practical efforts to reclaim authentic African culture.

Speaking for the Enslaved Antoinette T. Jackson, 2016-06-16. Focusing on the agency of enslaved Africans and their descendants in the South, this work argues for the systematic unveiling and recovery of subjugated knowledge, histories, and cultural practices of those traditionally silenced and overlooked by national heritage projects and national public memories. Jackson uses both ethnographic and ethnohistorical data to show the various ways African Americans actively created and maintained their own heritage and cultural formations. Viewed through the lens of four distinctive plantation sites, including the one on which that the ancestors of First Lady Michelle Obama lived, everyday acts of living, learning, and surviving profoundly challenge the way American heritage has been constructed and represented. A fascinating critical view of the ways culture, history, social policy, and identity influence heritage sites and the business of heritage research management in public spaces.

Racial Blackness and the Discontinuity of Western Modernity Lindon Barrett, 2013-12-30. The unfinished manuscript of literary and cultural theorist Lindon Barrett, this study offers a genealogy of how the development of racial blackness within the mercantile capitalist system of Euro American colonial imperialism was constitutive of Western modernity. Masterfully connecting historical systems of racial slavery to post-Enlightenment modernity, this pathbreaking publication shows how Western modernity depended on a particular conception of racism contested by African American writers and intellectuals from the eighteenth century to the Harlem Renaissance.

Cultures of Empire Catherine Hall, 2000. Collects together the best articles by key historians, literary critics, and anthropologists on the cultures of colonialism in the British Empire in the nineteenth and twentieth centuries. A substantial introduction by the distinguished historian Professor Catherine Hall discusses new approaches to the history of empire and establishes a narrative frame through which to read the essays which follow. The volume is clearly divided into three sections: theoretical, emphasising concepts and approaches; the colonisers at home, focusing on how empire was lived in Britain; and away, the attempt to construct new cultures through which the colonisers defined themselves and others in varied colonial

Challenges to Democratic Governance in Developing Countries Gedeon Mudacumura, Göktuğ Morçöl, 2014-01-04 Despite the large amounts of human and financial resources invested to foster democratic governance in developing countries statistics show that the majority of these countries have not yet achieved significant improvements in living standards While some regions make strides towards improving the living conditions of their citizens Sub Saharan Africa for instance is still trapped in poverty with more than 40% of its 600 million people living below the internationally recognized absolute poverty line of one US dollar per day Poor governance and corruption should be highlighted as the most important systemic factors contributing to poverty in developing countries As a result the institutional foundations of these countries are weakened public funds are misappropriated and policies and programs aimed at reducing poverty and fostering sustainable economic growth are undermined It is therefore not surprising that a 2008 Transparency International report found a direct link between corruption and the failure of the societal institutions designed to achieve the Millennium Development Goals in the majority of developing countries This book investigates the problems of democratic governance particularly as they relate to

corruption and also whether democracy should be based on universal principles or local context and historical factors It also analyses the rule of law in promoting democratic governance and curbing corruption and if governmental non governmental organizations and civil societies are effective in promoting democratic governance and curbing corruption This book will go beyond identifying the challenges and offer plausible solutions that could be adapted to various developing countries It is premised on the importance of bridging theory and practice which has been lacking in most local and international development publications making of interest to scholars and policy makers alike concerned with public administration in developing countries **Asia in Western and World History: A Guide for Teaching** Ainslie T. Changing Racial Regime Matthew Holden, Jr.,1995-01-01 The National Political Science Review is the official publication of the National Conference of Black Political Scientists The Review s purpose as described by Matthew Holden in his introduction is to lead to new information insights and findings into the social and political status of African Americans The volume is not exclusionist or narrow It integrates essays that could stand alone as they initially were written according to the method and theory of the author in question As presented here however they also lend themselves to a broader treatment of race and the political order The present volume combines essays expressly focused on African Americans Africa and the African diaspora At the same time it contains essays about broad generic subjects such as budgeting and interest groups written with no explicit racial relevance Holden integrates these essays under the theme of the changing racial regime The integrating concept is the old word regime which political scientists have used in many situations before to define such more or less persistent though not necessarily permanent orders of precedence If no significant benefits and no significant burdens could be forecast by knowledge of the social identity called race then the regime could be seen as non racial In American experience the regime was at one time purposeful and sustained white advantage The white race and its preferential standing was central to virtually all institutional practice public and private The significant contemporary question is the degree of change in the racial regime Some proceed with the assumption that a large degree of change has occurred in the American political system The view of other contributors is that the system still sustains racial stratification In its very internal dialogue this volume presents a panorama of current work by political scientists African American and other on the character of the American political system The Changing Racial Regime is an essential resource for political scientists black studies specialists and scholars and policy analysts of race relations in the United States **Identity in the Shadow of**

Slavery Paul E. Lovejoy, 2000-09-13 Addresses issues relating to the gender ethnic and cultural factors through which enslaved Africans and their descendents interpreted their lives under slavery thereby creating communities with a shared sense of identity The focus of the book is on the ways in which identities were formulated under slavery and the ways in which the struggle to escape slavery and its legacy continued to affect the lives of descendents of slaves The introductory essay explores an approach to the study of the African diaspora that looks outward from Africa and places the following chapters written by leading authorities from Europe and North and South America in the context of the theoretical literature
