skills and in particular decision making and strategic skills are the most critical factor for the outcome of catheter based  
cardiovascular interventions Currently such skills are commonly developed by the empirical trial and error method only In  
this textbook for the first time an explicit teaching training and learning approach is set out that will enable interventional  
operators whether cardiologists vascular surgeons vascular specialists or radiologists to learn about and to develop the  
cognitive skills required in order to achieve consistent expert level catheter based interventions It is anticipated that  
adoption of this approach will allow catheter based interventions to become a domain of excellence with rapid transfer of  
knowledge steep learning curves and highly efficient acquisition of complex skills by individual operators all of which are  
essential to meet successfully the challenges of modern cardiovascular care      **Nursing Interventions & Clinical Skills**
