

A to H is the horizontal distance measurement (with no obstructions) available at the upper landing.

A to B dimension: _____

A to C dimension: _____

A to H dimension: _____

A to D is the top track extension based on the desired seat height and will be determined in Step 3.

Note: Add 1½" to track length for each additional inch of seat height.

- Calculate the total track length by adding the track extension (determined in F) to the A to B or A to C measurement from Step 2.

Track Extension (A to D) _____

+ A to B or A to C _____

= Total Track Length _____

- Verify there is adequate clearance at the upper landing for the track extension (A to D) and seat. Minimum clearance required is 2" beyond the track extension. If adequate clearance is not available, consider a shorter seat height at the upper landing or contact Access Industries' Service Department about a ramp option.

- If adequate clearance exists, cut the lower piece of track from the lower end to the total track length from Step 3. Do not cut the track off at a spliced end.

C. TRACK

- Put the lower track cover on the lower end of the track. (See Figure 2)

Figure 2

Note: If your track is one piece only (total track length is 8' or less), skip to Step 4.

- File any burrs or rough edges off of the ends that are spliced together.
- Lay the sections of track on the staircases and turn the sections over as they are laying on the top side.
- Insert (2) track splice bars half way into the lower end of the upper track and secure each splice bar with the socket set screws. (See Figure 3)

Figure 3

- Slide the (2) pieces of track together and secure with socket set screws each. Ensure that a tight, flush joint is formed all the way around the track joint.
