organisations spectators community groups sponsors host governments the media and NGOs Each chapter addresses a specific stakeholder defines that stakeholder and its relationships with sports events describes the managerial requirements for a successful event assesses current research and directions for future research and outlines the normative dimensions of stakeholder engagement such as sustainability and legacy No other book takes such a broad view of sports event management surveying key theory current research best practice and moral and ethical considerations in one volume With contributions from leading sport and event scholars from around the world the Routledge Handbook of Sports Event Management is essential reading for any advanced student researcher or professional with an interest in sport management sport development sport policy or events

Modern Methods of Construction Design Ladislav Ševčík,Petr Lepšík,Michal Petrů,Ivan Mašín,Rudolf Martonka,2014-04-02 This book has been created on the basis of contributions to the 54th International Conference of Machine Design Departments that was held for the 60th anniversary of Technical University of Liberec This international conference which follows a tradition going back more than 50 years is one of the longest running series of conferences held in central Europe dealing with methods and applications in machine design The main aim of the conference was to provide an international forum where experts researchers engineers and industrial practitioners managers and Ph D students could meet share their experiences and present the results of their efforts in the broad field of machine design and related fields The book has seven chapters which focus on new knowledge of machine design optimization tribology experimental methods and measuring engineering analyses and product innovation Authors presented new design methods of machine parts and more complex assemblies with the help of numerical methods such as FEM Research measurements and studies of new materials including composites for energy efficient constructions are also described The book also includes solutions and results useful for optimization and innovation of complex design problems in various industries

Just Climate Futures Carolyn Snell,Lucie Middlemiss,Kelli Kennedy,Emily Morrison,Anne Owen,Samanthi Themini,Michelle,Tania Carregha,Yekaterina Chzhen,2025-08-14 If we are to meet Net Zero targets both climate policies and our daily lives require significant change The transition towards Net Zero will lead to inevitable trade offs between social economic and environmental objectives and this transition could disproportionately impact households already struggling with poverty and precarity This book takes a deep dive into the ways families and communities are or could be impacted by the implementation of climate policy It demonstrates that participation in Net Zero requires people to be economically culturally socially and politically engaged and provides a practical roadmap to encourage and support a truly just transition

The Hybrid Vehicle Dale Stubbart, I've been following advances in Electric Cars for nearly 50 years and advances in Hybrids for 15 I started following Electric Cars while writing a paper in History Class in 7th grade on current events I started following Hybrids when the Honda Insight was released in 1999 I also started following Fuel Cell Cars about that same time The Hybrid expands on Hybrid technologies discussing new potential and conceptual technologies If you're interested in cars

and especially if you re interested in Hybrids and Electric Cars then this book is for you whether you understand how cars work or not Rating G Reading Level Medium 8th Grade Longest Word Experimentation Racing Toward Zero Kelly Senecal,Felix Leach,2021-06-01 In Racing Toward Zero the authors explore the issues inherent in developing sustainable transportation They review the types of propulsion systems and vehicle options discuss low carbon fuels and alternative energy sources and examine the role of regulation in curbing emissions All technologies have an impact on the environment from internal combustion engine vehicles to battery electric vehicles fuel cell electric vehicles and hybrids there is no silver bullet The battery electric vehicle may seem the obvious path to a sustainable carbon free transportation future but it s not the only nor necessarily the best path forward The vast majority of vehicles today use the internal combustion engine ICE and this is unlikely to change anytime soon Improving the ICE and its fuels entering a new ICE age must be a main route on the road to zero emissions How do we go green The future requires a balanced approach to transportation It s not a matter of choosing between combustion or electrification it s combustion and electrification As the authors say The future is eclectic By harnessing the best qualities of both technologies we will be in the best position to address our transportation future as quickly as possible ISBN 9781468601466 ISBN 9781468601473 ISBN 9781468602005 DOI 10 4271 9781468601473
