Bowker's Medical Books in Print ,1975 *Reader's Guide to the History of Science* Arne Hessenbruch,2013-12-16 The

Reader s Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn *Biomimicry for Optimization, Control, and Automation* Kevin M. Passino,2005-09-08 Biomimicry uses our scientific understanding of biological systems to exploit ideas from nature in order to construct some technology In this book we focus on how to use biomimicry of the functional operation of the hardware and software of biological systems for the development of optimization algorithms and feedback control systems that extend our capabilities to implement sophisticated levels of automation The primary focus is not on the modeling emulation or analysis of some biological system The focus is on using bio inspiration to inject new ideas techniques and perspective into the engineering of complex automation systems There are many biological processes that at some level of abstraction can be represented as optimization processes many of which have as a basic purpose automatic control decision making or automation For instance at the level of everyday experience we can view the actions of a human operator of some process e g the driver of a car as being a series of the best choices he or she makes in trying to achieve some goal staying on the road emulation of this decision making process amounts to modeling a type of biological optimization and decision making process and implementation of the resulting algorithm results in human mimicry for automation There are clearer examples of biological optimization processes that are used for control and automation when you consider nonhuman biological or behavioral processes or the internalology of the human and not the resulting external behavioral characteristics like driving a car For instance there are homeostasis processes where for instance temperature is regulated in the human body *The United States Catalog* Mary Burnham,Carol Hurd,1928 **Bulletin** ,1937 Journal of Biological Education ,1985 **Current Catalog** National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70
