[The man who grew his own Amazon rainforest - BBC World Service](#)

Like all other major tropical rainforest areas on our planet, the Amazon rainforest is being cut down and cleared at an alarming rate. At this moment in time, it still remains as by far the largest unbroken ecosystem of tropical rainforest in the world.

The Amazon is a vast region that spans across eight rapidly developing countries: Brazil, Bolivia, Peru, Ecuador, Colombia, Venezuela, Guyana, Suriname and French Guiana, an overseas territory of France. It is almost 8 times bigger than Texas or more than half the size of the entire United States.

The Amazon contains:

Ecotourism in Appalachia Al Fritsch, Kristin Johannsen, 2014-10-17 Tourism is the world's largest industry and ecotourism is rapidly emerging as its fastest growing segment. As interest in nature travel increases, so does concern for conservation of the environment and the well-being of local peoples and cultures. Appalachia seems an ideal destination for ecotourists with its rugged mountains, uniquely diverse forests, wild rivers, and lively arts culture. And ecotourism promises much for the region: protecting the environment while bringing income to disadvantaged communities. But can these promises be kept? *Ecotourism in Appalachia* examines both the potential and the threats that tourism holds for Central Appalachia. The authors draw lessons from destinations that have suffered from the tourist trap syndrome, including Nepal and Hawaii. They conclude that only carefully regulated and locally controlled tourism can play a positive role in Appalachia's economic development.

Environmental Ethics and Film Pat Brereton, 2015-09-16 *Environmental ethics* presents and defends a systematic and comprehensive account of the moral relation between human beings and their natural environment and assumes that human behaviour toward the natural world can and is governed by moral norms. In contemporary society, film has provided a powerful instrument for the moulding of such ethical attitudes. Through a close examination of the medium, *Environmental Ethics and Film* explores how historical ethical values can be reimagined and reconstituted for more contemporary audiences. Building on an extensive back catalogue of eco-film analysis, the author focuses on a diverse selection of contemporary films which target audiences' ethical sensibilities in very different ways. Each chapter focuses on at least three close readings of films and documentaries examining a wide range of environmental issues as they are illustrated across contemporary Hollywood films. This book is an invaluable resource for students and scholars of environmental communication, film studies, media and cultural studies, environmental philosophy and ethics.

50 Simple Steps to Save the World's Rainforests Kim Henderson, The Green Patriot Working Group, 2012-03-12
Despite the very best conservation and environmental policy making efforts at least 80 000 acres of tropical rainforest disappear each day If action is not taken now experts estimate that the world's rainforests will mostly disappear within 50 years Currently the destruction of tropical forests is responsible for 17 percent of man made carbon emissions more than what comes from all the world's cars airplanes and ships combined Tropical rainforests need our help and that's where 50 Simple Steps to Save the World's Rainforests comes in The future of the world's rainforests lies to a large extent in the collective hands of consumers and how they shop since demand is what fuels the forces driving deforestation agriculture logging and resource extraction Through the 50 step journey you will learn how as a consumer you may unwittingly support rainforest destruction and more importantly precisely how you can make different choices that help save rainforests For example you will learn how your paper use and purchases of rayon clothing affect Indonesian rainforests where Sumatran tigers are critically endangered or how simply eating Brazil nuts helps save the Amazon rainforest You will discover how the cultivation of palm oil a common ingredient in confections baked goods soaps and biofuels is fueling rampant deforestation in Malaysia Indonesia and Papua New Guinea and how you can avoid it 50 Simple Steps to Save the Rainforests is the ultimate primer for anyone wanting to take action to help save this ecosystem which is so critical to the future of mankind
