Adaptivity as a Transformative Disposition David Hung, Kenneth Y. T. Lim, Shu-Shing Lee, 2013-11-19 This volume introduces the concept of adaptivity as occurring when say individuals cross boundaries Through illustrations from both formal and informal learning the book seeks to provide learning designs and frameworks for adaptivity This book is unique as it ties together a social individual dialectics and b adaptive learning as it relates to creativity and imagination It highlights case studies from social new media contexts school learning milieux and formal and informal situations It approaches adaptive learning from the perspectives of students teachers school leaders and participants in social media and other digitally mediated environments The book is a valuable resource for practitioners and

academics who are interested in adaptivity as a learning disposition *The Illustrated London News* ,1865 *Innovations in Educational Change* David Hung, Shu-Shing Lee, Yancy Toh, Azilawati Jamaludin, Longkai Wu, 2019-08-07 This book offers an ecological perspective to understand the opportunities and complexities of spreading and sustaining educational innovations. It explores the imperatives underpinning educational reforms and identifies the role of schools in developing, disseminating and sustaining changes in Singapore's educational context. It also includes international case studies that examine the dialectical relationships between structure, people and culture and demonstrate that cultivating ecologies involves leveraging affordances and resources across the education system to create new contexts, synergies and capacities. Further, it argues that educational innovations and reforms also need to consider tacit knowledge and conditions of transfer which may be ambiguous and challenging. Few books address the nuances and interactions of innovation and change across levels of the education ecology from the micro classroom, meso organisation, school, exo partners, macro policy and chrono time scales. The ecological perspective adopted in this book explores the dynamic tensions in order to understand the interplays of policy and school level influences that contextualize school innovations. By presenting multiple voices and views, it allows impediments and affordances of innovation diffusion to be discussed holistically, which is an integral caveat for nurturing a sustainable ecology that enables innovations.
