

VOLVO COMPACT EXCAVATOR
EC20B XT, XTV

MORE CARE. BUILT IN.

DIG IN TO SOLID PERFORMANCE.

When you want a strong and reliable compact excavator to meet your toughest demands - look to the Volvo EC20B. Its compact design is big on versatility, comfort and performance. Built for easy operation and maintenance, it's the most cost-effective business investment you'll ever make.

Move with precision

The Volvo EC20B is also built for precision work. Utilizing the best technology available, the advanced boom-sensing hydraulic system delivers precise control under any condition. Hydraulic speed relies only on the position of the counterweight, regardless of the load or number of movements. This quality allows you to combine all machine movements for less precision and more precise the work.

Increase your speed and productivity

The units also feature fuel boost sprays for fast cycle times that save both time and money. The exclusive quick-coupling system lets you easily convert an attachment or bucket right from the cab for increased speed and efficiency.

Compact by design

The hydraulic offset of the boom reduces the overall excavator dimensions, helping you work in tight spaces and alongside walls. In addition, the steep-rearward slope of the counterweight provides protection against rear impact.

Built strong

The EC20B features a double-pin joint that doubles the bearing surface on the chassis. There is also a long pin that distributes the stress for reduced wear and longer life. The boom and dipper structure incorporates cast steel parts in heavily stressed areas. Heavy steel plates protect all hydraulic connections for reduced spilling costs. A hydraulic master valve the boom pin directly without a reduction gear, offering no wear in jib, heavy duty, long and anchor joints make coupling jobs easier. An optional pin that located back the machine's starting and hydraulic function for added safety.

Intake flexibility

The variable-width chasses offer the choice of two cost-effective production systems. Choose the exceptional stability of an ultra-wide chassis or the versatility of a machine that can fit through small spaces with an overall width reduced to less than 7 m. The 200 mm wide tracks offer excellent stability, traction and long life. For increased flexibility, the blade system offers two side extensions. Each blade can be fixed or removed without tools in one time and money.

► Trackless track and blade

► Reduced track for greater mobility

► Blade design for fast track changes
