

VOLVO PENTA AQUAMATIC DUOPROP

D6-370/DP

272 kW (370 hp) crankshaft power acc. to ISO 8665

Available
with J/boatkit

Exceptional diesel performance

Volvo Penta's 6-cylinder D6-370 is developed from the latest design in modern diesel technology. The engine has common rail fuel injection system, double overhead camshafts, 4 valves per cylinder, turbocharger, compressor, and aftercooler. The interaction of these, the large swept volume, and the EVC system results in exceptional diesel performance combined with low emissions.

D6-370 with DP Duoprop drive

World-class performance

The common rail fuel injection system, controlled by EVC, and the compressor, in combination with a large swept volume, ensure unique torque over the whole speed range. The acceleration is very powerful, with virtually no sign of smoke. This matched with the engine's high load-carrying capability creates a sporty feeling and power, when needed.

Compact and robust

The engine is lightweight and extremely compact for its large swept volume and high output. With the rear-end transmission, driving the high-pressure injection pump and the camshafts, a high degree of integrated systems, a high-efficiency aftercooler, a marinization performed with very few hoses, and a fully symmetric engine, the package simply gets that compact.

The rigid cast-iron cylinder block and head, ladder frame, and exactly controlled (up to three steps) fuel injection gives excellent on-board comfort with low noise and vibration levels.

EVC-D

EVC-D, a new generation of the proven Electronic Vessel Control offers the best driver experience available!

The new ergonomically designed controls engage smoothly and allow for maneuvering with fingertip precision in any situation. Integrated pushbuttons give easy access to functions such as Power Trim Assistant, Tow Mode and Single Lever Control, which allows for safe and easy boating.

Complete the helm with your choice from the full range of easy-to-read gauges and displays including the new 7" color display. Add the trip computer function for accurate fuel management and minimized environmental impact. Engine synchronisation is of course standard in twin installations.

The Duoprop drive

The corrosion-resistant aluminum drive is based on the experience with the well-proven original DP drive, and fully matched to the very powerful engine. The modern styling, the hydrodynamic design for low drag, and the Duoprop high strength bronze propellers, specially developed for the drive, make the package complete. This results in unbeatable boat characteristics in terms of acceleration, top speed, and drivability.

The drive comes equipped with fully hydraulic further developed X-act steering. It features integrated external steering cylinders, controlled by an exact feedback valve as standard.

The integrated exhaust system and seawater intake, a hallmark for Volvo Penta, are also standard.

Meeting new emission standards

The common rail injection system in combination with electronics and an advanced combustion system are setting new standards in minimizing noxious emissions and particulates. The engine complies with IMO NOx limits and the comprehensive emission requirements EU RCD and US EPA Tier 2.

The DP drive has been designed to lead exhaust gases into the propeller path, to avoid the "station wagon effect" and keep noise levels at a minimum.
