Volvo Blind Spots:

HWM, 2005-10 Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in depth reviews

Vehicle Safety Communications Tao Zhang, Luca Delgrossi, 2012-09-04 Provides an up to date in depth look at the current research design and implementation of cooperative vehicle safety communication protocols and technology Improving traffic safety has been a top concern for transportation agencies around the world and the focus of heavy research and development efforts sponsored by both governments and private industries Cooperative vehicle systems which use sensors and wireless technologies to reduce traffic accidents can play a major role in making the world's roads safer Vehicle Safety Communications Protocols Security and Privacy describes fundamental issues in cooperative vehicle safety and recent advances in technologies for enabling cooperative vehicle safety It gives an overview of traditional vehicle safety issues the evolution of vehicle safety technologies and the need for cooperative systems where vehicles work together to reduce the number of crashes or mitigate damage when crashes become unavoidable Authored by two top industry professionals the book Summarizes the history and current status of 5.9 GHz Dedicated Short Range Communications DSRC technology and standardization discussing key issues in applying DSRC to support cooperative vehicle safety Features an in depth overview of on board equipment OBE and roadside equipment RSE by describing sample designs to illustrate the key issues and potential solutions Takes on security and privacy protection requirements and challenges including how to design privacy preserving digital certificate management systems and how to evict misbehaving vehicles Includes coverage of vehicle to infrastructure V2I communications like intersection collision avoidance applications and vehicle to vehicle V2V communications like extended electronic brake lights and intersection movement assist Vehicle Safety Communications is ideal for anyone working in the areas of or studying cooperative vehicle safety and vehicle communications

Computer Vision for Driver Assistance Mahdi Rezaei, Reinhard Klette, 2017-02-06 This book summarises the state of the art in computer vision based driver and road monitoring focussing on monocular vision technology in particular with the aim to address challenges of driver assistance and autonomous driving systems While the systems designed for the assistance of drivers of on road vehicles are currently converging to the design of autonomous vehicles the research presented here focuses on scenarios where a driver is still assumed to pay attention to the traffic while operating a partially automated vehicle Proposing various computer vision algorithms techniques and methodologies the authors also provide a general review of computer vision technologies that are relevant for driver assistance and fully autonomous vehicles Computer Vision for Driver Assistance is the first book of its kind and will appeal to undergraduate and graduate students researchers engineers and those generally interested in computer vision related topics in modern vehicle design

Autonomous Vehicle Technology Mingfang Du, 2022-09-23 The subject of this book is artificial intelligence AI introducing the fast road sensing algorithm and system based on image pattern recognition for unmanned vehicle especially for traffic sign recognition and

complex road recognition With rich figures and credible data this book systematically and comprehensively describes the core technology and industrialization focus of today s unmanned vehicle system which can be used as a reference for R D Engineers and industrialization practitioners of unmanned vehicle and it can also be used as a teaching material for higher grades and postgraduates in colleges and universities

Advances in Embedded Computer Vision Branislav Kisačanin,Margrit Gelautz,2014-11-26 This illuminating collection offers a fresh look at the very latest advances in the field of embedded computer vision Emerging areas covered by this comprehensive text reference include the embedded realization of 3D vision technologies for a variety of applications such as stereo cameras on mobile devices Recent trends towards the development of small unmanned aerial vehicles UAVs with embedded image and video processing algorithms are also examined Topics and features discusses in detail three major success stories the development of the optical mouse vision for consumer robotics and vision for automotive safety reviews state of the art research on embedded 3D vision UAVs automotive vision mobile vision apps and augmented reality examines the potential of embedded computer vision in such cutting edge areas as the Internet of Things the mining of large data streams and in computational sensing describes historical successes current implementations and future challenges

Object Detection, Collision Warning, and Avoidance Systems Ronald K. Jurgen,2007 Contains 51 papers covering eight years of research on object detection collision warning and collision avoidance Topics covered include Parking aids Target tracking with cameras Sensor combinations Blind spot detection Imager chips Lane tracking Lane and road departure warning Sensor fusion Intersection collision warning Front and rear end crash avoidance Automatic collision avoidance systems Braking systems for collision avoidance and Driver vehicle interface requirements
