## Handling Cautions

Install the cash register in a location not subject to direct sunlight, unusual temperature changes, high humidity, or splashing water.

Do not operate the cash register with wet hands. Water can cause internal component failure.

The cash register plugs into any standard wall outlet (local voltage is 110V/AC).

Avoid connecting any other electrical devices on the same electrical circuit since such connection could cause the cash register to malfunction.

When cleaning the cash register, use a dry, soft cloth. Never use volatile liquids, such as benzene or thinner. Chemicals can discolor or damage the cabinet.

For protection against data loss, please install three new "AA" batteries before using the cash register. However, never forget you must initialize the cash register before installation of batteries; otherwise damage to memory contents or malfunctioning of the register will occur. You can start operating it only after initializing it and then installing batteries.

For complete electrical disconnection, pull out the main plug.

## Getting Started

### Initializing the Cash Register

For your cash register to operate properly, you must initialize it before programming for the first time. Follow this procedure:

1. Remove the register from its packing carton.
2. Set the mode switch to the **REG** position.
3. Insert the plug into the AC outlet.  
**WARNING:** This operation must be performed without batteries loaded.
4. The buzzer will sound three times. Now your cash register has been initialized. The display will show "0.00" with "—" (The "—" indicates that the batteries are not installed.)

### Installing a Paper Roll

Always install the paper roll even when you set the register for not printing a printed or receipt-REG mode.

1. Push the printer cover forward and detach it.
2. Push the paper roll release lever and install the paper roll so that the paper unrolls from the bottom and towards the front.

### Installing Batteries

Batteries must be installed in the cash register to prevent data and programmed contents from being lost from the memory in case of accidental disconnection of the AC cord or power failure. Please install three new "AA" batteries before programming and operating the cash register. Once installed, the batteries will last approximately one year. When it is time to replace them, the "L" symbol will appear on the display to indicate a low battery voltage. If the symbol appears, you must replace them within two days. Initialize the batteries according to this procedure with the AC cord connected:

1. Pull the printer cover upward and detach it.

2. Open the battery cover next to the paper roll cradle.

3. Insert three new "AA" batteries.

4. When the batteries are properly installed, "L" on the display will disappear. Close the battery cover.

5. Attach the printer cover.

Improper use of batteries could cause them to burst or leak, which might damage the interior of the cash register. Please take the following precautions:  
Be sure that the positive (+) and negative (-) poles of each battery are oriented properly.  
Never mix batteries of different types.  
Never mix old batteries and new ones.  
Always insert dead batteries in the battery compartment.  
Remove the batteries if you plan not to use the cash register for long periods.  
(Should a battery leak, clean out the battery compartment immediately, taking care not to let the battery fluid come into direct contact with your skin.)

3. Insert the paper straight into the paper inlet, and press the **[L]** key. The inserted end comes out at the printing area.

4. (For journal printing) Insert the top end of the paper into the slot in the take-up spool shaft and wind the paper two or three times. Then place the take-up spool on the bearing.

5. Attach the printer cover.  
(For receipt printing, step 4 should be omitted.)

### Setting the Time

Set the mode switch to the **2PM** position and enter the time in 4 digits (thruout) using the 24-hour system. Press the **[L]** key once for date/time programming or twice to exit the program mode.

0000 22

Always enter the time in 4 digits even when the hour is in the single digit. For example, enter 0000 for 0:00 a.m., 0030 a.m. for 3:00 a.m., 0030 p.m. for 3:00 p.m., print 0030-00.

### Setting the Date

In the **2PM** mode, enter the date in 4 digits using the month-day-year format. Press the **[L]** key once to continue programming or twice to exit the program mode.

000000 22

Always enter the date in 4 digits. For example, enter 0000 for January 1, 2000. If you change the date format in the **2PM** mode, follow the newly specified format when setting the date.

### Checking the Time and Date

You can display the time and date to check if they are correctly set.

1. Set the mode switch to the **REG** position.
2. Press the **[L]** key once to display the time.
3. Press the **[L]** key a second time to display the date.

### Tax Programming

Before you can proceed with registration of sales, you must first program the tax that is levied in accordance with the law of your province. Your cash register comes with the ability to program four different tax rates. There are two types of tax program: GST (Goods and Service Tax) and PST (Provincial Sales Tax) and the tax calculation method varies from province to province. Your cash register, however, can be programmed to calculate Canadian taxes automatically.

1. Selecting the Tax Calculation System  
You must select one among the eleven types of tax calculation system listed below depending on your province and the type of your retail business. These types represent different combinations of taxation methods. There are mainly two types of taxation methods (VAT or Add on Tax) for GST and two for PST (Tax on base or Tax on top). Whether to use the "Tax on top" system or the "Tax on base" system, as the taxation method varies from province to province. Contact your local tax office for further sales tax information.
