Mental Health Informatics Ardis Hanson, Bruce Lubotsky Levin, 2013-01-17 Mental Health Informatics offers a comprehensive examination of contemporary issues in mental health that focuses on the innovative use of computers and other information technology in support of patient care, education, services delivery and research in the field of mental health services. This text deals with resources, devices and formalized methods for optimizing the storage, retrieval and management of information for problem solving and decision making in mental health. Mental health informatics is an interdisciplinary field based upon computer and information sciences, the cognitive and decision sciences, public health and mental health, including epidemiology and telecommunications. Researchers in informatics have discovered new methods and techniques to enhance health and mental health care, scientific and applied research and education through information technology. The fourteen chapters are divided into four main parts including: 1. an introduction to informatics, public health and mental health; 2. an overview of the ethical, legal, services delivery and organizational issues in data records, standards and technology adoption; 3. discusses research in today's online environment addressing issues including research competencies, standards for literature reviews, constructing search strategies and synthesizing findings; and 4. provides a discussion of the globalization of information and future issues in policy and practice in mental health informatics.

Developing Technology Mediation in Learning Environments Soares, Filomena, Lopes, Ana Paula, Brown, Ken, Uukkivi, Anne, 2019-12-27 Most technologies have been harnessed to enable educators to conduct their business remotely. However, the social context of technology as a mediating factor needs to be examined to address the perceptions of barriers to learning due to the lack of social interaction between a teacher and a learner in such a setting. *Developing Technology Mediation in Learning Environments* is an essential reference source that widens the scene of STEM education with an all encompassing approach to technology mediated learning, establishing a context for technology as a mediating factor in education. Featuring research on topics such as distance education, digital storytelling and mobile learning, this book is ideally designed for teachers, IT consultants, educational software developers, researchers, administrators and professionals seeking coverage on developing digital skills and professional knowledge using technology.
