### Identifying the Constant of Proportionality

I can identify the constant rate of change in a table, graph, equation, diagram or verbal description.  
Directions: Read the word problem below. Find the unit rate as requested.

|                                                                                                                                                            |                                                                                                                                                                |    |   |   |         |    |   |   |                                                                                                                               |
|------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|----|---|---|---------|----|---|---|-------------------------------------------------------------------------------------------------------------------------------|
| 1.                                                                                                                                                         | 2. Andrea is a street artist and draws caricatures. If in four hours she can draw 5 portraits, and in 8 hours, she can draw 9 portraits, what is her constant? |    |   |   |         |    |   |   |                                                                                                                               |
| 3. <table border="1"> <tr> <td>1st Day</td> <td>24</td> <td>3</td> <td>6</td> </tr> <tr> <td>2nd Day</td> <td>32</td> <td>4</td> <td>8</td> </tr> </table> | 1st Day                                                                                                                                                        | 24 | 3 | 6 | 2nd Day | 32 | 4 | 8 | 6. It costs \$18 to send 3 packages to Bonnie's friends and they were all the same amount to ship. What is the constant rate? |
| 1st Day                                                                                                                                                    | 24                                                                                                                                                             | 3  | 6 |   |         |    |   |   |                                                                                                                               |
| 2nd Day                                                                                                                                                    | 32                                                                                                                                                             | 4  | 8 |   |         |    |   |   |                                                                                                                               |

**Finding Area in Real World Problems**  
I can solve real world problems involving area of two-dimensional and three-dimensional objects.  
Directions: Solve each word problem below.

|                                                                                                                                                                                                                    |                                                                                                                                                                        |                                                                                                                                                          |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Mrs. Green wants to paint polka dots on one wall of her office. Each circle will have a 10" radius. If there will be 36 circles on the one wall, what will be the total area covered by the painted polka dots? | 2. Vincent wants to find the area covered by a circular dog run at his apartment. The diameter of the dog run measures 48 feet. What is the total area of the dog run? | 3. Billy wants to find the difference in the amount of pizza he gets between a 6" pizza and a 10" pizza. How much more area is covered by the 10" pizza? |
| 4. A quarter has a diameter of 24 millimeters. If you                                                                                                                                                              | 5. The bottom of a circular swimming pool with a                                                                                                                       | 6. A fountain in the middle of town has a diameter of                                                                                                    |

|                                                                                                                                                      |                                                                                                                                          |                                                                                                                                                                                                       |
|------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| cubes are rolled together 20 times. A sum of 8 is rolled 5 times. What is the experimental probability of rolling a sum of 8?                        | sections is spun 60 times. Red was spun 24 times. Compare the experimental probability of spinning red with the theoretical probability. | experimental probability of rolling a sum that is <u>less than 7</u> ?                                                                                                                                |
| 4. Two coins are tossed 10 times and both coins land on heads 6 of those times. Compare the experimental probability to the theoretical probability. | 5. In problem 4, what do you think would happen if each coin was tossed 50 times?                                                        | 6. Suppose you added a third coin to the one on problem 4 and tossed them 10 times and all three coins landed on heads 1 time each. Compare the experimental probability and theoretical probability. |
