The EC35C is a Compact excavator with caterpillar drive.

The engine is a vertical, water-cooled, in-line, four cylinder, four-stroke diesel engine with direct injection, type D2.2. It is a low emission engine with automatic idle control.

Driving movements are made via two crawlers. Each crawler is driven by an axial piston engine with two speeds and a planetary gear. The axial piston engine has automatic load-dependent shifting from the high to the low speed.

The hydraulic system is a hydraulic load-sensing system which guarantees complete independence of the individual movements.

The superstructure swivel movement is guaranteed by a hydraulic radial piston motor which directly (i.e. without reduction gear) drives a ball-mounted swing ring gear with internal toothing and remote lubrication.

The undercarriage consists of a series of rollers, track shoes, sprockets, idlers and chamfered side members.
