Sustainable Federal Facilities Federal Facilities Council, The Federal Facilities Council Ad Hoc Task Group on Integrating Sustainable Design, Life-Cycle Costing, and Value Engineering into Facilities Acquisition, 2001-04-30 In the late 1990s several of the sponsor agencies of the Federal Facilities Council began developing and implementing initiatives and policies related to sustainable development Guidance related to life cycle costing and value engineering was recognized as being supportive of sustainable development in particular when used in the conceptual planning and design phases of acquisition where decisions are made that substantially effect the ultimate performance of a building over its life cycle However specific concerns were raised that when federal agencies apply value engineering in the final stages of design or

during construction in response to cost overruns design features that support sustainable development may be eliminated The primary objective of this study therefore was to develop a framework to show how federal agencies can use value engineering and life cycle costing to support sustainable development for federal facilities and meet the objectives of Executive Order 13123
