Farmers' Crop Varieties and Farmers' Rights Michael Halewood, 2016-03-21

Over the last 50 years there has been a growing appreciation of the important role that farmers play in the development and conservation of crop genetic diversity and the contribution of that diversity to agro ecosystem resilience and food security. This book examines policies that aim to increase the share of benefits that farmers receive when others use the crop varieties that they have developed and managed, i.e. farmers' varieties. In so doing, the book addresses two fundamental questions. The first question is how do farmer management practices along with other factors such as environment and the breeding systems of plants affect the evolution and maintenance of discrete farmers' varieties. The second question is how can policies that depend on being able to identify discrete plant varieties accommodate the agricultural realities associated with the generation, use and maintenance of farmers' varieties. This focus on discreteness is topical because there are no fixed internationally recognized taxonomic or legal definitions of farmers' varieties. And that presents a challenge when developing policies that involve making specific discrete farmers' varieties the subject of legal rights or privileges. The book includes contributions from a wide range of experts including agronomists, anthropologists, geneticists, biologists, plant breeders, lawyers, development practitioners, activists and farmers. It includes case studies from Asia, Africa, Latin America and Europe where, in response to a diversity of contributing factors, there have been efforts to develop policies that provide incentives or rewards to farmers as stewards of farmers' varieties in ways that are sensitive to the cultural, taxonomic and legal complexities involved. The book situates these initiatives in the context of the evolving discourse and definition of farmers' rights, presenting insights for future policy initiatives.

[SADC Gender Protocol 2017 Barometer](#) Morna, Colleen Lowe, Makamure, Lucia, 2017-10-04. The SADC Protocol on Gender and Development is the only sub-regional instrument in the world that brings together global and continental commitments to gender equality in one instrument used to enhance accountability. The Southern African Gender Protocol Alliance is a network of country and regional NGOs that campaigned for the Protocol, its updating, implementation, and tracking. Originally aligned to the Millennium Development Goals that expired in 2015, SADC Gender Ministers updated the Protocol and aligned it to the Sustainable Development Goals (SDGs), Beijing Plus Twenty, and the Africa Agenda 2063 in 2016. In July 2017, the Ministers adopted a Monitoring, Evaluation, and Reporting Framework (MERF) that will be the basis of future reporting. Now in its ninth edition, the 2017 Barometer is the first assessment of the Post 2015 SADC Gender Protocol. Moving with the times, the Alliance has expanded the two key main yardsticks in the Barometer: the SADC Gender and Development Index (SGDI) and the Citizen Score Card (CSC). The Barometer incorporates many MERF and SDG indicators, as well as its own unique measures of voice, choice, and control. The Barometer also introduces the Gender Responsive Assessment of Constitutions and Laws, conducted by Alliance experts and networks around the region. A wealth of data, insights, and analysis awaits all readers of the Barometer that will also be made available online and in multi-media formats. The SADC we want is one in which citizens engage, step it up for gender equality, and make sure we achieve Planet 50/50 by 2030.
