**Chemical Literacy and Writing Chemical Reactions** Nikolay Gerasimchuk, 2022-09-12 Writing chemical reactions in general and inorganic chemistry is not a trivial task. However, writing reactions for chemical processes correctly is a clear indicator of proficiency and competence in a subject. Unfortunately, very few students grasp the concept of the correct writing of chemical reactions quickly and so are unable to move through topics of general analytical and inorganic chemistry freely. Because the ability to write and balance different types of chemical reactions is a fundamental issue, this becomes a key question of chemical literacy. The successful writing of chemical reactions includes two components: the prediction of products of these reactions and their possible variations and balancing these reactions, providing a material balance between starting compounds and reaction products. This book explores that element of the teaching of the fundamentals of chemical literacy: writing complete equations of chemical reactions and balancing them. It contains 49 figures, 22 schemes and 12 tables and 93 problems with answers. This book will be very useful for high school students interested in chemical sciences, higher education teachers, students in colleges and universities majoring in chemistry and biochemistry, and chemistry professionals working in industry. It also contains information about properties of the most common elements and applications of a variety of their chemical compounds.

Dans cette nouvelle édition les auteurs ont ajouté un grand nombre de notions nouvelles acquises au cours des huit dernières années ce qui enrichit presque toutes les sections. Mais outre ce renouvellement de contenu ils ont également revu entièrement leur approche pédagogique présentant la matière de manière aussi complète et précise que possible. Les auteurs ne se contentent pas d'exposer les connaissances mais ils attirent l'attention du lecteur sur la manière dont ces connaissances ont été acquises. Ils mettent par ailleurs en évidence les conséquences concrètes des recherches notamment leurs applications médicales.
