Innovations in Hospital Architecture Stephen Verderber,2010-03-31 Captures key developments in the field of sustainable hospital architecture [H21](#) Dominic Feng,2015 This project consists of four parts which together aim to evoke a sustainable and green design for the next generation hospital which each part itself has been intrigued by the very basic thought of hospital and hospitalizing in different epochs and aspects Part 01 gives a brief historical ichnography of hospitals through ten canonical examples since ancient Greek to present This part whose title is inspired by Peter Eisenman s book Ten Canonical Buildings This part intends to open a critical and through view of the way people were thinking about the space for the sick people and successful findings and the inspiration it seeks for future in hospitalizing phenomena Part 02 reviews contemporary problems of healthcare industry primarily in the United States intending to combine the research results of management science into healthcare sphere and to provoke how a healthcare facilities in future can be managed and constructed Part 03 includes a context study page in function and design of the existing University of Florida Shands Complex and a guideline page of the accreditation systems of sustainable healthcare buildings It also considers the possible future applica tion of the concepts discussed with a practical design project of Cardiovascular Center in UF Health Shands at University of Florida Part 04 contains the sustainable healthcare architecture strategem associated with the design proposal of UF Health Cardiovascular Center which are concerned with hospital design trends of today and particularly with the evaluation of a scientifically contemporary standards for green buildings

Improving Sustainability During Hospital Design and Operation Stefano Capolongo,Marta Carla Bottero,Maddalena Buffoli,Emanuele Lettieri,2015-02-25 This book describes the Sustainable High Quality Healthcare SustHealth project which had the goal of developing an original multidisciplinary evaluation tool that can be applied to assess and improve hospitals overall sustainability The comprehensive nature of the appraisal offered by this tool exceeds the scope of most current rating systems which typically permit a thorough evaluation of relevant environmental factors when designing a new building but fail to consider social and economic impacts of the design phase or the performance of the hospital s operational structure in these fields The multidisciplinary evaluation system was developed from its very inception through to its testing by following a scientific experimental method in which a global perspective was constantly maintained as opposed to a focus only on specific technical issues Application of the SustHealth rating tool to a currently functioning hospital or one under design will identify weaknesses and guide users to potential low cost short term solutions and longer term strategies for improvement

Architecture and Health Dina Battisto,Jacob J. Wilhelm,2019-10-17 Architecture and Health recognizes the built environment and health as inextricable encouraging a new mind set for the profession Over 40 international award winning projects are included to explore innovative design principles linked to health outcomes The book is organized into three

interdependent health domains individual community and global in which each case study proposes context specific architectural responses Case studies include children s hospitals rehabilitation facilities elderly housing mental health facilities cancer support centers clinics healthy communities healthcare campuses wellness centers healing gardens commercial offices infrastructure for developing countries sustainable design and more Representing the United States Africa Asia Europe and Australia each author brings a new perspective to health and its related architectural response This book brings a timely focus to a subject matter commonly constricted by normative building practices and transforms the dialogue into one of creativity and innovation With over 200 color images this book is an essential read for architects designers and students to explore and analyze designed environments that promote health and well being *The Architecture of Medical Imaging* Bill Rostenberg, FAIA, Steven C. Horii, 2006-06-12 Serves as a guide to the design of the medical imaging facilities for health care including radiology MRI CT scan PET scan This work discusses the complex issues aiming to make it understandable to health care planners department heads and executives **Agenda** Julien De Smedt (Firm), Jesse Seegers, 2009 AGENDA occupies the territory between a monograph diary and a collection of essays interviews and conversations produced by JDS Architects with a wide range of contributors and collaborators Starting from the belief that an agenda is not simply an expression of individual intentions but rather a vector for the production of new realities AGENDA addresses the need for architecture to transform itself in an era of ecological and economic crisis Change the buzzword of the last U S presidential campaign is indeed the order of the day and AGENDA explores exactly what kind of change will be needed if architects are to assume a political and social agency in this new landscape The book seeks to define not only the work of JDS Architects but also the challenges and situations confronting young architectural practices emerging at a time of crisis An ambitious attempt to describe the conditions within which architecture is produced today *Architecture Today*, 2006 *Contract*, 2007 *Healthcare Architecture as Infrastructure* Stephen H. Kendall, 2018-11-19 Architects and healthcare clients are increasingly coming to recognize that once built healthcare facilities are almost immediately subject to physical alterations which both respond to and affect healthcare practices This calls into question the traditional ways in which these facilities are designed If functions and practices are subject to alteration the standard approach of defining required functions and practices before acquiring facilities is obsolete We need other starting points working methods and ways of collaborating Healthcare Architecture as Infrastructure presents these new approaches Advocating an infrastructure theory of built environment transformation in which design and investment decisions are organized hierarchically and transcend short term use the book draws the practice and research of a number of architects from around the world Written by experts with experience in policy making designing building and managing complex healthcare environments it shows professionals in architecture engineering healthcare and facilities management how to enhance the long term usefulness of their campuses and their building stock and how to strengthen their physical
