The Psychology Of Human Possibility And Constraint:

The Psychology of Human Possibility and Constraint Jack Martin, Jeff Sugarman, 1999-01-01 Resolves the fundamental debate between cognitivists and social constructionists concerning the metaphysics of human psychology and offers new insights into therapy education and creativity

The Psychology of Personhood Jack Martin, Mark H. Bickhard, 2012-11-29 What is a person Surprisingly little attention is given to this question in psychology For much of the past century psychology has tended to focus on the systematic study of processes rather than on the persons who enact and embody them In contrast to the reductionist picture of much mainstream theorising which construes persons as their mental lives behaviours or neurophysiological particulars The Psychology of Personhood presents persons as irreducibly embodied and socially situated beings Placing the study of persons at the centre of psychology this book presents novel insights on the typical everyday actions and experiences of persons in relation to each other and to the broader society and culture Leading scholars from diverse academic disciplines paint an integrative portrait of the psychological person within evolutionary historical cultural developmental and everyday contexts

The Psychological Development of Girls and Women Sheila Greene, 2014-11-27 Choice Recommended Read This thoroughly revised new edition updates Sheila Greene's original transformative account of the psychological development of girls and women and the central role of time in shaping human experience Greene critically reviews traditional and contemporary theoretical approaches ranging from orthodox psychoanalysis to relational and post modern theories and argues that even those that claim to focus on development have presented a view of women's lives as fixed and determined by their nature or their past These theories she believes should be rejected because of their inherent lack of validity and their frequently oppressive implications for women Essential but often neglected insights from the more compelling developmental and feminist theories are woven together within a theoretical framework that emphasizes temporality emergence and human agency The result is a liberating theory of women's psychological development as constantly emerging and changing in time rather than as static and fixed by their nature socio cultural context and personal history Updated for a new generation of readers The Psychological Development of Girls and Women will continue to be essential reading for students and researchers in the psychology of women developmental psychology and women's studies

The SAGE Handbook of Philosophy of Education Richard Bailey, Robin Barrow, David Carr, Christine McCarthy, 2010-03-23 This book provides an authoritative yet accessible guide to the Philosophy of Education its scope its key thinkers and movements and its potential contribution to a range of educational concerns The text offers a balanced view of three key dimensions first in giving an equal weight to different styles and modes of philosophy second by including past and present perspectives on philosophy of education and third in covering both the general perennial issues in philosophy and issues of more contemporary concern Section one of the book exemplifies different styles of philosophy paying attention to the contemporary debates as to the nature possibilities and limitations of these different

approaches to philosophy of education Section two is devoted to particular thinkers of the past and more general coverage of the history of philosophy of education Section three is dedicated to contemporary philosophic thought on education providing the basis and reference point for an exploration of contemporary issues The handbook is designed primarily to be useful to students studying the field of philosophy of education in the context of the study of educational foundations or theory But it is also designed to be of use to practising teachers who wish to gain easy access to current philosophical thinking on particular contemporary educational issues and to educationalists of all types who want a succinct guide to questions relating to the nature the history and the current state of the art of philosophy of education

Academic Motivation of Adolescents Tim Urdan, Frank Pajares, 2002-09-01 Few academic issues are of greater concern to teachers parents and school administrators than the academic motivation of the adolescents in their care There are good reasons for this concern Students who are academically motivated perform better in school value their schooling are future oriented in their academic pursuits and possess the academic confidence and positive feelings of self worth so necessary to increasing academic achievement Because academically motivated students engage their schoolwork with confidence and interest they are less likely to drop out of school suffer fewer disciplinary problems and prove resilient in the face of setbacks and obstacles It is precisely because academic motivation is so essential to academic achievement that motivation has taken a place along with cognition as one of the most followed lines of inquiry in educational psychology In this volume we are fortunate to gather together some of the most eminent scholars who have written extensively about the academic motivation of adolescents We are fortunate also in that they represent the varied theories and lines of inquiry that currently dominate research in this area In all we believe that in the dozen chapters that comprise this volume the authors provide elegant insights regarding the academic and social motivation of adolescents that will prove of interest to researchers students teachers school administrators parents policymakers and all others who play a pivotal role or are otherwise invested in the lives of adolescents in today's society It is our hope that these insights will not only further the conversation on adolescence and education but will serve as the impetus for further research capable of generating the creative ideas programs and structures so necessary to better the lives of the young people in our care

Overcoming Discrimination in Schools Globally

Joseph Zajda, 2025-08-23 This book focuses on global research findings dealing with various forms of visible discrimination in the classroom. The synthesis of research evidence suggests that intelligence discrimination, race and ethnicity discrimination, social class discrimination, labeling students according to their academic achievement, and the self-fulfilling prophecy SFP have a powerful impact on students' self-esteem, engagement, motivation, and their academic achievement. Research findings also demonstrate a positive correlation between teachers' perception of their students' abilities and students' actual performance in the classroom. The book analyses and critiques recent research findings dealing with major forms of discrimination in schools, discriminatory practices, their impact on students, and implications for the student's social identity, self-esteem, and academic achievement. Finally, the book offers relevant and valid strategies for overcoming unacceptable levels of discrimination in schools. This book serves as a sourcebook of ideas for researchers, educators, practitioners, and policy makers specializing in the areas of globalisation, performance, culture, and discrimination in schools. It offers an overview of education policy reforms and strategies for eliminating discrimination in schools and enhancing authentic education reforms designed to provide the equality/quality of education for all. **The Idea of Suicide** Michael J.

Kral, 2019-05-21 This book is about a new theory of suicide as cultural mimesis or as an idea that is internalized from culture. Written as part of a new critical focus in suicidology, this volume moves away from the dominant, strictly scientific understanding of suicide as the result of a mental disorder and towards positioning suicide as an anthropologically salient, community-driven phenomenon. Written by a leading researcher in the field, this volume presents a conception of suicide as culturally scripted and it demonstrates how suicide becomes a cultural idiom of distress that for some can become a normative option. **Persons in Context** Roger Frie, William J. Coburn, 2011-01-19 In contemporary forms of psychoanalysis, particularly intersubjective systems theory, the turn towards contextualism has permitted the development of new ways of thinking and practicing that have dispensed with the notion of isolated individuality. For many who embrace this post-subjectivist way of thinking and practicing, the recognition that all human experience is fundamentally immersed in the world makes the question of individuality seem confusing, even anachronistic. Yet the challenge of individuality remains an important and pressing issue for contemporary theory and practice; many clinicians are left to wonder about the role of individual experience and how to approach it conceptually or clinically. This volume of original essays gives the problem of individuality its due without losing sight of the importance of contextualized experience. Drawing on a variety of disciplinary backgrounds—philosophical, developmental, biological, and neuroscientific—the contributors address the tension that exists between individuality and the emergence of contextualism as a dominant mode of psychoanalytic theory and practice, thereby providing unique insights into the role and place of individuality both in and out of the clinical setting. Ultimately, these essays demonstrate that individuality, no matter how it may be defined, always occurs within a contextual web that forms the basis of human experience. Contributors: William J. Between Chance and Choice Harald Atmanspacher,Robert Bishop,2014-06-23 Are choice and free will possible in a world governed by deterministic fundamental equations What sense would determinism make if many events and processes in the world seemed to be governed by chance These and many other questions emphasize the fact that chance and choice are two leading actors on stage whenever issues of determinism are under discussion This volume collects essays by accomplished scientists and philosophers addressing numerous facets of the concept of determinism The contributions cover viewpoints from mathematics physics cognitive science and social science as well as various branches of philosophy They offer valuable reading for everyone interested in the interdisciplinary relations between determinism chance and free will The desire to foster an interdisciplinary dialogue on determinism chance and free will was the initial impetus leading to an international workshop on determinism taking place at Ringberg Castle near Lake Tegernsee south of Munich in June 2001 Representatives from mathematics physics cognitive and social science and various branches of philosophy convened to discuss numerous aspects of determinism from their disciplinary perspectives This volume is based on elaborated and refereed manuscripts of their lectures **Towards a Comparative Institutionalism** Rómulo Pinheiro,Francisco O. Ramirez,Karsten Vrangbaek,Lars Geschwind,2016-01-06 The volume examines ongoing dynamics within the organizational fields of health care and higher education as seen from an institutional theory perspective To date few studies have

attempted to compare developments across these two critical societal sectors and actors *International Perspectives on Adolescence* Tim Urdan, Frank Pajares, 2003-11-01

Youth-full Productions Nancy Ares, 2010 The grounding concept of this book is that youth are active agents in creating cultural

practices and social spaces Drawing from disciplines including anthropology sociology education and cultural studies the chapters examine practices that youth who are members of traditionally marginalized groups develop through engagement in the varied contexts of their everyday lives Each chapter treats communities language communication and interaction patterns and culturally derived practices as valuable resources youth bring to the tasks and situations they negotiate across time and space The combination of chapters that fall within traditions of social and cultural foundations with those that fall within disciplinary learning focused approaches sets this book apart Across the chapters notions of youth as active agents in the production of knowledge selves and practice are illuminated by focusing on how youth participate in construction of assemblages of historically derived practices evolving relations of power discourses and new social cultural forms and practices The book also includes the editor s responses to the two main sections of the work a conversation in writing aimed at making explicit both what ties the chapters within the sections together and the broader implications of the combined and unique contributions

An Interdisciplinary Approach to the Human Mind Line Joranger, 2018-10-11 One of the main aims of modern mental health care is to understand a person s explicit and implicit ways of thinking and acting So it may seem like the ultimate paradox that mental health care services are currently overflowing with brain concepts belonging to the external visible brain world and that neuroscientists are poised to become new experts on human conduct *An Interdisciplinary Approach to the Human Mind* shows that to create care that is truly innovative mental health care workers must not only ask questions about how their conceptions of human beings and psychological phenomena came into being but should also see themselves as co creators of the mystery they seek to solve Looking at the human being as a being with a biological body and unique subjective experiences living in a reciprocal relationship with its sociocultural and historical environment the book will provide examples and theories that show the necessity of an innovating interdisciplinary mental health care service that manages to adapt its theory and methods to environmental biological and subjective changes To this end the book will provide an innovating psychology that offers a broad kaleidoscope of perspectives about the relations between the history of psychology as a scientific discipline oriented to interpret and explain subject and subjectivity phenomenon and the social construction of subjectified experience This unique and timely book should be of great interest to critical and cultural psychologists and theorists clinical psychologists therapists and psychiatrists sociologists of culture and science anthropologists philosophers historians and scholars working with social and health theories It should also be essential reading for lawyers advocates and defenders of human rights The Open Access version of this book available at <https://www.taylorfrancis.com/books/9781315309682> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 licence
