The Rejuvenation Process:

Handbook Of Software Aging And Rejuvenation: Fundamentals, Methods, Applications, And Future Directions Tadashi Dohi, Kishor S Trivedi, Alberto Avritzer, 2020-04-22 The Handbook of Software Aging and Rejuvenation provides a comprehensive overview of the subject making it indispensable to graduate students as well as professionals in the field. It begins by introducing fundamental concepts, definitions, and the history of software aging and rejuvenation research, followed by methods, tools, and strategies that can be used to detect, analyze, and overcome software aging.

Plant Aging Roberto Rodríguez, R. Sanchez Tamés, D.J. Durzan, 2012-12-06 For many, the terms aging, maturation, and senescence are synonymous and used interchangeably, but they should not be. Whereas senescence represents an endogenously controlled degenerative programme leading to plant or organ death, genetic aging encompasses a wide array of passive degenerative genetic processes driven primarily by exogenous factors. Leopold, 1975 Aging is therefore considered a consequence of genetic lesions that accumulate over time but by themselves do not necessarily cause death. These lesions are probably made more severe by the increase in size and complexity in trees and their attendant physiology. Thus, while the withering of flower petals following pollination can be considered senescence, the loss of viability of stored seeds more clearly represents aging. Norden, 1988 The very recent book *Senescence and Aging in Plants* does not discuss trees, the most dominant group of plants on the earth. Yet both angiospermic and gymnospermic trees also undergo the above phenomena, but less is known about them. Do woody plants senesce or do they just age? What is phase change? Is this synonymous with maturation? While it is now becoming recognized that there is no programmed senescence in trees, senescence of their parts even in gymnosperms, e.g., needles of temperate conifers, last an average of 3-5 years, is common, but aging is a readily acknowledged phenomenon. In theory, at least in the absence of any programmed senescence, trees should live forever, but in practice, they do not.

Web-to-Host Connectivity Anura Guruge, 2000-05-17 E-mail, e-marketing, e-commerce, e-business, and e-communities: just a few years ago, having a presence on the Web was considered innovative. Today, a Web presence is not only innovative, it's imperative. With the advent of home banking, package tracking, order entry, order status inquiry, and other customer services, a business without a Web strategy will soon be out of business. Driven by the needs of e-commerce, *Web-to-Host Connectivity* demonstrates how to connect legacy systems and databases to the Web and describes the technologies needed to do it. It provides comprehensive coverage of web-to-host solutions and technologies in addition to security, server, network, and system management usage. This book places an emphasis on improving data access and data exchange, no matter where it resides.

Vision beyond Visual Perception Borko Kovačević, Ian Richards, Junichi Toyota, 2017-05-11 Vision is crucial for the survival of all animals. However, as this book shows, its importance does not simply lie in visual perception but is rather deeply rooted in human physiology, psychology, and culture. For instance, conceptual metaphors often involve vision, such as "Seeing is Touching" and "Eyes are Limbs" among others. However, this Anglo-centric linguistic view belies the fact that vision is not a universally preferred source for metaphor, and less studied languages spoken in the four corners of the world can present cases that are unfamiliar to those who are only acquainted with Indo-European languages and cultures. In fact, other types of perception, such as hearing, are often preferred as a source of comprehension in a number of languages. This volume studies various issues concerning vision both synchronically and diachronically. Its discussion involves specialists from different disciplines ranging from cognitive science to literary scholarship. It also covers a wide range of geographical regions, such as Africa and Asia. As such, this volume will serve to shed light on the integration of disciplines concerning vision.
