The Renaissance 1999 2012 Progress Testing

Vaughan Monamy

The Renaissance 1999 2012 Progress Testing:

Re-examining Language Testing Glenn Fulcher, 2015-06-12 Winner of the SAGE ILTA Book Award 2016 Re-examining Language Testing explores ideas that form the foundations of language testing and assessment. The discussion is framed within the philosophical and social beliefs that have forged the practices endemic in language education and policy today. From historical and cultural perspectives, Glenn Fulcher considers the evolution of language assessment and contrasting claims made about the nature of language and human communication: how we acquire knowledge of language abilities and the ethics of test use. The book investigates why societies use tests and the values that have driven changes in practice over time. The discussion is presented within an argument that an Enlightenment-inspired view of human nature and advancement is most suited to a progressive, tolerant and principled theory of language testing and validation. Covering key topics such as measurement validity, accountability and values, *Re-examining Language Testing* provides a unique and innovative analysis of the ideas and social forces that shape the practice of language testing. It is an essential read for advanced undergraduate and postgraduate students of Applied Linguistics and Education. Professionals working in language testing and language teachers will also find this book invaluable.

Wild Policy Tess Lea, 2020-07-14 Can there be good social policy? This book describes what happens to Indigenous policy when it targets the supposedly wild people of regional and remote Australia. Tess Lea explores naturalized policy: policy unplugged, gone live, ramifying in everyday life to show that it is policies that are wild, not the people being targeted. Lea turns the notion of unruliness on its head to reveal a policy-driven world dominated by short-term political interests and their erratic, irrational effects, and by the less obvious protection of long-term interests in resource extraction and the liberal settler lifestyles this sustains. *Wild Policy* argues policies are not about undoing the big causes of enduring inequality and do not ameliorate harms terribly well, either without yielding all hope. Drawing on efforts across housing and infrastructure, resistant media, making health governance and land tenure battles in regional and remote Australia, *Wild Policy* looks at how the logics of intervention are formulated and what this reveals in answer to the question: why is it all so hard? Lea offers readers a layered, multi-relational approach called policy ecology to probe the related question: what is to be done? Lea's case material will resonate with analysts across the world who deal with infrastructures, policy technologies, mining, militarization, enduring colonial legacies and the Anthropocene.

Gold: How it Shaped History Alan Ereira, 2024-11-30 Gold is not what we think It is usually discussed in the context of wealth and art but this book has a broader subject so fundamental that it has been largely unremarked Informed by a mass of recent discoveries and a South American indigenous perspective it offers a new way of understanding the history of civilization Gold has been coinage treasure and adornment But it has been much more as the hidden driver of wars and revolutions the rise and fall of empires and the transformation of societies As the sun traveled east to west across the sky gold incorruptible and corrupting flowed west to east hand to hand across the world That flow has brought empires to grow and collapse and driven plunder conquest and colonization It brought about wars and revolutions empowered new forms of arts and science and created the capitalist consumer economy that dominates us now All the gold people ever shaped still exists shining as new it can be mislaid but never decays Right from its first appearance on the west shore of the Black Sea long before the rise of Egypt and Mesopotamia gold crowned the first proto king Ever since it has been regarded as value incarnate with transcendental power The quantity we take has been increasing steadily for 6 500 years Now extraction accelerates Our gold mountain has doubled in the last fifty years Yet its price increases faster While the quantity doubled its buying power multiplied by six What does gold do that makes us want it so much As Alan Ereira reveals in this skilfully woven narrative gold is the hidden actor that shapes our story
