The Progressive Education Fallacy In Developing Countries:

The Progressive Education Fallacy in Developing Countries Gerard Guthrie, 2011-06-23 This book provides a provocative but carefully argued addition to the theory and practice of education in developing countries. The book provides an ethical and empirical justification for support of formalistic teaching in primary and secondary schools in developing countries. It also refutes the application of progressive education principles to curriculum and pre and in service teacher education in such contexts. The central focus of this book is the formalistic teaching prevalent in the classrooms of many developing countries. Formalistic teacher centred traditional didactic pedagogic teaching is appropriate in the many countries with revelatory epistemologies unpopular and old fashioned though these methods may seem in some western especially Anglophone ones. Formalism has been the object of many failed progressive curriculum and teacher education reforms in developing countries for some 50 years.

Classroom Change in Developing Countries Gerard Guthrie, 2018-04-09 Progressive Education derived mainly from Anglo American culture has been the primary frame of reference for student centered classroom change in developing countries for over 50 years. Yet in many developing countries strong evidence shows that progressivism has not replaced teacher centered formalistic classroom practice. *Classroom Change in Developing Countries: From Progressive Cage to Formalistic Frame* presents a robust case for why formalism should be the primary frame of reference for upgrading classroom teaching in developing countries. Theoretically rich yet grounded in practice, the book draws on case studies from Africa, China and Papua New Guinea to show how culturally intuitive formalistic teaching styles can induce positive classroom change. Synthesising research and evaluation literature on classroom change in developing countries, Guthrie examines some of the methodological flaws in the literature. The book considers the progressive cage and looks at Confucian influences on teaching in China, progressive reform failures in both Sub Saharan Africa and Papua New Guinea as well as offering a critical take on some failings in comparative education. It examines the formalistic frame, addresses methodological issues in culturally grounded research and offers a model of teaching styles for basic classroom research. The book concludes by returning the focus back to teachers and considers the so called teacher resistance to change. The book will be an essential purchase for academics and research students engaged in the fields of classroom teaching, teacher education and curriculum and will also be of interest to academics, aid officials and decision makers in developing countries.

Emerging Critical Scholarship in Education Carol Mutch, Jean Rath, 2014-04-23 The doctoral journey is fraught with stops and starts, crossroads and blind alleys, surprises and epiphanies. All successful doctoral students navigate a pathway through these events to reach their final destination. *Navigating the Doctoral Journey* explores examples of these routes in ways that both honour individual stories and highlight the broader issues of uniting emergent research practices with doctoral candidates' individual reflexive projects. All the doctoral candidates included in this book work with critical topics, theories and methods within the field of education; they face particular challenges and rewards.

when pursuing work that will meet institutional and disciplinary expectations of good doctoral level research For them the doctoral process is required to culminate in more than the award of a qualification Their imperative is to demonstrate mastery of the disciplinary norms whilst simultaneously challenging dominant models and making authentic contributions to the benefit of broader society Navigating the Doctoral Journey addresses the isolation and challenges of what it means to conduct critical doctoral research within a highly contested domain of knowledge This is not a simplistic self help guide to clearly map a proven route to doctoral success rather the book provides a range of possible answers to the questions of how candidates experience doctoral studies what is critical about each contributor s research and how this affects what each person does as he or she researches

Education Quality and Social Justice in the Global South Leon Tikly, Angeline M. Barrett, 2013-06-07 Drawing on state of the art evidence about implementing education quality in low income countries this book opens up the black box of the classroom and explores how practices of teaching and learning impact on different groups of learners in the global South

Mandela the Spear and Other Poems Atukwei Okai, 2013-06-24 The strength of *Mandela the Spear* and other Poems lies in Okai's burning desire to celebrate the black experience and culture through the iconic figures who symbolize those struggles and triumphs Thus not surprisingly one encounters names like Mandela Nadine Gordimer Amílcar Cabral Patrice Lumumba Kwame Nkrumah to name a few Okai has long established himself as one of the towering figures in the field of modern African poetry in English He is regarded as one of the pioneers of a vigorous reinvention of the poetic genre that revolutionized the poet audience relationship changed the mode of expression from scriptography to narratology and the role of the audience from that of passive reception to active participation

Teaching and Learning in Context Richard Tabulawa, 2013 Since the 1990s sub Saharan Africa has experienced unprecedented attempts at reforming teacher and student classroom practices with a learner centred pedagogy regarded as an effective antidote to the prevalence of teacher centred didactic classroom practices Attempts at reform have been going on all over the continent In fact learner centred pedagogy has been described as one of the most pervasive educational ideas in contemporary sub Saharan Africa and elsewhere Research has revealed that the major attempts have largely failed mainly because teachers have not been able to adopt instructional innovations to technical problems This failure is also related to lack of resources and poor teacher training programmes which lead to poor teacher quality among others This book attempts to explain why pedagogical change has not occurred in spite of the much energy and resources that have been committed to such reforms The book also takes us inside what the author calls the socio cultural world of African classrooms to help us understand the reasons teachers dominate classroom life and rely disproportionately on didactic methods of teaching Its conceptual analyses capture the best of both the sociology and the anthropology of education in contexts of poverty as well as the politics of education The book concludes that a socio cultural approach should be the basis for developing culturally responsive indigenous pedagogies though these may or may not turn out to be in any way akin to constructivist learner

centred pedagogies Globalization and Education Jeffrey S. Brooks, Anthony H. Normore, Melanie C. Brooks, Nicola Sum, 2022-06-01 Globalization and Education Teaching Learning and Leading in the World Schoolhouse explores the various ways educators work is influenced by globalization This book presents topics and contexts traditionally marginalized in mainstream education research discourses and shows how local and global education issues are intersecting and shaping the ways in which ideas and practices are shared around the world Each chapter presents an educational issue in an understudied international context such as Saudi Arabia Guyana Bangladesh Malaysia Indonesia Brazil and Nepal Topics range from how the knowledge industry shapes education in schools to the impact of globalization on school leadership teaching and learning We invite scholars and practitioners to join us in the world schoolhouse a place where discussion about educational understanding and improvement is not bounded by national borders school systems or language This book will both challenge and expand thinking about the complexities of education during a time of globalization and change
