The Philosophy Of Perception Phenomenology And Image Theory:

The Philosophy of Perception Lambert Wiesing, 2014 **The Palgrave Handbook of Image Studies** Krešimir Purgar, 2021-10-01 This handbook brings together the most current and hotly debated topics in studies about images today In the first part the book gives readers an historical overview and basic diachronical explanation of the term image including the ways it has been used in different periods throughout history In the second part the fundamental concepts that have to be mastered should one wish to enter into the emerging field of Image Studies are explained In the third part readers will find analysis of the most common subjects and topics pertaining to images In the fourth part the book explains how existing disciplines relate to Image Studies and how this new scholarly field may be constructed using both old and new approaches and insights The fifth chapter is dedicated to contemporary thinkers and is the first time that theses of the most prominent scholars of Image Studies are critically analyzed and presented in one place **Philosophy of Dance** Peter A. French, Howard K. Wettstein, Patrick Londen, 2020-01-21 This volume brings together new work in the philosophy of dance for a general philosophical audience Scholars working across the fields of philosophy dance studies and related areas explore the nature of dance as a practice and an artform This collection of essays covers topics such as the experience of dancing the nature and appreciation of dance artworks and the distinctive contribution of dance to philosophical understanding **Self and Affect** Stefan Lang, Maik Niemeck, 2025-01-11 The self self awareness and emotions are central subjects within contemporary philosophy of mind but comparatively little attention has been paid to the relationships between them This volume brings together philosophers from different specialisms to explore these relationships from three different angles First whether a theory of self awareness can contribute to a theory of emotion including how different aspects and kinds of self awareness are related to different emotions Second from the opposite direction whether research into emotions can help achieve a better understanding of self consciousness Finally the book considers how emotions are involved in the nature and development of selves Self and Affect is essential reading for all scholars and researchers of the philosophy of mind especially those focussing on emotions and self awareness **The Routledge Companion to Photography Theory** Mark Durden, Jane Tormey, 2019-11-07 With newly commissioned essays by some of the leading writers on photography today this companion tackles some of the most pressing questions about photography theory s direction relevance and purpose This book shows how digital technologies and global dissemination have radically advanced the pluralism of photographic meaning and fundamentally transformed photography theory Having assimilated the histories of semiotic analysis and post structural theory critiques of representation continue to move away from the notion of original and copy and towards materiality process and the interdisciplinary The implications of what it means to see an image is now understood to encompass not only the optical but the conceptual ethical and haptic experience of encountering an image The fractal is now used to theorize the new condition of photography as an algorithmic medium and leads us to reposition our relationship to

photographs and lend nuances to what essentially underlies any photography theory that is the relationship of the image to the real world and how we conceive what that means Diverse in its scope and themes The Routledge Companion to Photography Theory is an indispensable collection of essays and interviews for students researchers and teachers The volume also features extensive images including beautiful colour plates of key photographs **Images, Reality, and Digital Culture** Krešimir Purgar, 2025-09-30 Focusing on the moment of transition from the pictorial to the post pictorial condition this book advocates the opinion that what fundamentally distinguishes pictorial representation in Western civilization is one's ability to distinguish what the picture shows from what the picture refers to and to that extent the reality inside the picture cannot be confused with what is outside it The contributions in this book serve as kind of a missing link connecting the genealogy of traditional images with contemporary environmental visualizations in the world that in this very moment undergoes a transition into a new exciting age in which many old knowledges are rapidly becoming obsolete and new ones are seeking their legitimacy Instead of leading the reader to reconciliation with the fatal diagnosis of the world under the rule of technological determinism this book indicates the key points of transition between the pictorial representation that traditionally belonged to the history of art and the virtual presence that is approached in quite different ways today This book will be of interest to scholars working in art history image philosophy image studies and digital studies

Schattenfroh Michael Lentz, 2025-08-19 An intricate metaphysical ambitious psychogeography of the self that both disrupts and elevates the 21st century vision of the novel Our narrator is held in complete darkness and isolation His endless thoughts are turned into the book we are reading Schattenfroh directed by none other than the narrator's mysterious jailer by the same name Undulating through explorations of Renaissance art the German reformation time defying esoterica the printing process in the 16th century Kabbalistic mysticism and beyond Schattenfroh is a remarkable book that in turn asks the remarkable of its readers Interruptions breaks and annotations both buoy and deceive and endless historical references literary allusions and wordplay construct a baroque encyclopedic quest Schattenfroh's publication in English marks a seminal moment in the history of the literary form **Phenomenology** Walter Hopp, 2020-06-01 The central task of phenomenology is to investigate the nature of consciousness and its relations to objects of various types The present book introduces students and other readers to several foundational topics of phenomenological inquiry and illustrates phenomenology's contemporary relevance The main topics include consciousness intentionality perception meaning and knowledge The book also contains critical assessments of Edmund Husserl's phenomenological method It argues that knowledge is the most fundamental mode of consciousness and that the central theses constitutive of Husserl's transcendental idealism are compatible with metaphysical realism regarding the objects of thought perception and knowledge Helpful tools include introductions that help the reader segue from the previous chapter to the new one chapter conclusions and suggested reading lists of primary and some key secondary sources Key Features Elucidates and engages with contemporary work in

analytic epistemology and philosophy of mind Provides clear prose explanations of the necessary distinctions and arguments required for understanding the subject Places knowledge at the center of phenomenological inquiry Quasi-Things Tonino Griffero, 2017-03-15 In this book Tonino Griffero introduces and analyzes an ontological category he terms quasi things These do not exist fully in the traditional sense as substances or events yet they powerfully act on us and on our states of mind He offers an original approach to the study of emotions regarding them not as inner states of the subject but as atmospheres that is as powers poured out into the lived space we inhabit Griffero first outlines the general and atmospheric characters of quasi things and then considers examples such as pain shame the gaze and twilight which he argues is responsible for penetrating and suggestive moods precisely because of its vagueness With frequent examples from literature and everyday life *Quasi Things* provides an accessible aesthetic and phenomenological account of feelings based on the paradigm of atmospheres *The Oneiric in the Films of David Lynch* Raphael Morschett, 2024-06-27 *The Oneiric in the Films of David Lynch* is the first systematic book length study to explore the nature and function of dreams in David Lynch's different phases and audio visual formats There is hardly a contemporary film director whose name is as closely linked to the dream like as that of David Lynch Both popular and academic discourse frequently identify Lynch's films by their dreamlike qualities However in the existing literature on Lynch these qualities tend to remain underspecified in terms of their experiential dimension Departing from an interest in the phenomenon of dream experience this is the first systematic book length study exploring the nature and function of the oneiric in the director's different phases and audio visual formats It shows that over the course of 50 years Lynch has developed a cinematic aesthetics of the oneiric an ensemble of four dream related dimensions that unfolds its full potential in the dynamic interplay between sensory address and reflective medialization On the one hand the Lynchian oneiric presents a markedly sensory perceptual mode of experience both characters and viewers are challenged in their perceptual patterns while at the same time being immersed in the material dream scenario On the other hand the Lynchian oneiric provides a mode of both psychological and medial reflection Not only the characters but the films themselves are inclined to turn back on themselves in a dream exploring the preconditions possibilities and limitations of their own existence and ability to know the world The oneiric in Lynch's films is thus of phenomenological media theoretical and philosophical interest **Empiricisms** Barry Allen, 2021 *Empiricisms* is about the value of experience and experiments Why do we esteem them and what is their contribution to knowledge The work is unique in the detail with which it explains empiricism from its beginning in ancient medicine to its emergence as a philosophy of modern science It elucidates the ideas of the so called radical empiricists clarifying their relation to historical empiricism and explaining what is radical about them and develops a comparison between European empiricism and ideas and practice in traditional China Bringing China into the argument is an unexpected innovation and makes the work a model for comparative philosophy

Atmospheres and Shared Emotions Dylan Trigg, 2021-11-25 This book explores the role atmospheres play in shared emotion With insights from leading scholars in the field Atmospheres and Shared Emotions investigates key issues such as the relation between atmospheres and moods how atmospheres define psychopathological conditions such as anxiety and schizophrenia what role atmospheres play in producing shared aesthetic experiences and the significance of atmospheres in political events Calling upon disciplinary methodologies as broad as phenomenology film studies and law each of the chapters is thematically connected by a rigorous attention on the multifaceted ways atmosphere play an important role in the development of shared emotion While the concept of atmosphere has become a critical notion across several disciplines the relationship between atmospheres and shared emotion remains neglected The idea of sharing emotion over a particular event is rife within contemporary society From Brexit to Trump to Covid 19 emotions are not only experienced individually they are also grasped together Proceeding from the view that atmospheres can play an explanatory role in accounting for shared emotion the book promises to make an enduring contribution to both the understanding of atmospheres and to issues in the philosophy of emotion more broadly Offering both a nuanced analysis of key terms in contemporary debates as well as a series of original studies the book will be a vital resource for scholars in contemporary philosophy aesthetics human geography and political science

Atmosphere/Atmospheres Tonino Griffero, 2019-02-01T00:00:00+01:00 What is an Atmosphere As part of the book series Atmospheric Spaces this volume analyses a new phenomenological and aesthetic paradigm based on the notion of the Atmosphere conceived as a feeling spread out into the external space rather than as a private mood The idea of Atmosphere is here explored from different perspectives and disciplines in the context of a full valorization of the so called affective turn in Humanities

The Blackwell Guide to Continental Philosophy Robert Solomon, David Sherman, 2008-04-15 The Blackwell Guide to Continental Philosophy is an accessible but sophisticated introduction to the most important figures in Continental philosophy in the last 200 years Presents a definitive introduction to the core figures and topics of continental philosophy Contains newly commissioned essays all of which are written by internationally distinguished scholars Provides a solid foundation for further study Subjects include Hegel Schopenhauer Kierkegaard Marx and Marxism Nietzsche Husserl and Phenomenology Heidegger Sartre critical theory Habermas Gadamer Foucault Derrida postmodernism and French feminism

The Complexity of Psychopathy Jennifer E. Vitale, 2022-03-12 This book provides a nuanced view of psychopathy by linking this syndrome to acknowledged DSM categories and exploring diverse theoretical perspectives for the conceptualization of this condition While other volumes focus on the uniqueness of the disorder this book highlights the heterogeneity of psychopathy and the implications of that heterogeneity for research

and treatment Directed to both clinicians and researchers this volume aims to improve understanding and treatment for this complex condition *German-Language Nature Writing from Eighteenth Century to the Present* Gabriele Dürbeck,Christine Kanz,2024-05-11 This volume examines the topic of German language nature writing in a broad historical context spanning more than two centuries It brings together contributions on the debates of the category Nature Writing by numerous renowned international scholars It discusses literary texts of natural history nature exploration nature poetry perception and reflection by German speaking authors since the 18th century including texts by Ulrike Draesner and on Esther Kinsky s writing The book asks whether the here discussed texts can should or may also be labeled as Nature Writing and how this new perspective on German literary history might change traditional classifications such as Naturlyrik nature poetry in German literary history **Philosophy's Nature: Husserl's Phenomenology, Natural Science, and Metaphysics**

Emiliano Trizio,2020-08-31 This book offers a systematic interpretation of the relation between natural science and metaphysics in Husserl s phenomenology It shows that Husserl s account of scientific knowledge is a radical alternative to established methods and frameworks in contemporary philosophy of science The author s interpretation of Husserl s philosophy offers a critical reconstruction of the historical context from which his phenomenological approach developed as well as new interpretations of key Husserlian concepts such as metaphysics idealization life world objectivism crisis of the sciences and historicity The development of Husserl s philosophical project is marked by the tension between natural science and transcendental phenomenology While natural science provides a paradigmatic case of the way in which transcendental phenomenology ontology empirical science and metaphysics can be articulated it has also been the object of philosophical misunderstandings that have determined the current cultural and philosophical crisis This book demonstrates the ways in which Husserl shows that our conceptions of philosophy and of nature are inseparable Philosophy s Nature will appeal to scholars and advanced students who are interested in Husserl and the relations between phenomenology natural science and metaphysics
