those working across borders The Machine Question David J. Gunkel, 2017-09-08 An investigation into the assignment of moral responsibilities and rights to intelligent and autonomous machines of our own making One of the enduring concerns of moral philosophy is deciding who or what is deserving of ethical consideration Much recent attention has been devoted to the animal question consideration of the moral status of nonhuman animals In this book David Gunkel takes up the machine question whether and to what extent intelligent and autonomous machines of our own making can be considered to have legitimate moral responsibilities and any legitimate claim to moral consideration The machine question poses a fundamental challenge to moral thinking questioning the traditional philosophical conceptualization of technology as a tool or instrument to be used by human agents Gunkel begins by addressing the question of machine moral agency whether a machine might be considered a legitimate moral agent that could be held responsible for decisions and actions He then approaches the machine question from the other side considering whether a machine might be a moral patient due legitimate moral consideration Finally Gunkel considers some recent innovations in moral philosophy and critical theory that complicate the machine question deconstructing the binary agent patient opposition itself Technological advances may prompt us to wonder if the science fiction of computers and robots whose actions affect their human companions think of HAL in 2001 A Space Odyssey could become science fact Gunkel's argument promises to influence future considerations of ethics ourselves and the other entities who inhabit this world

Material Falsity and Error in Descartes' Meditations Cecilia Wee, 2006-09-27 Material Falsity and Error in Descartes's Meditations approaches Descartes's Meditations as an intellectual journey wherein Descartes's views develop and change as he makes new discoveries about self God and matter The first book to focus closely on Descartes's notion of material falsity it shows how Descartes's account of material falsity and correspondingly his account of crucial notions such as truth falsehood and error evolves according to the epistemic advances in the Meditations It also offers important new insights on the crucial role of Descartes's Third Meditation discussion of material falsity in advancing many subsequent arguments in the Meditations This book is essential reading for those working on Descartes and early modern philosophy It presents an independent reading on issues of perennial interest such as Descartes's views on error truth and falsehood It also makes important contributions to topics that have been the focus of much recent scholarship such as Descartes's ethics and his theodicy Those working on the interface between medieval and modern philosophy will find the discussions on Descartes's debt to predecessors like Suarez and Augustine invaluable

Cognitive Pluralism Steven Horst, 2024-07-02 An argument that we understand the world through many special purpose mental models of different content domains and an exploration of the philosophical implications Philosophers have traditionally assumed that the basic units of knowledge and understanding are concepts beliefs and argumentative inferences In Cognitive Pluralism Steven Horst proposes that another sort of unit a mental model of a content domain is the fundamental unit of understanding He argues that understanding comes not in word sized concepts sentence sized beliefs or argument sized reasoning but in the

form of idealized models and in domain sized chunks He argues further that this idea of cognitive pluralism the claim that we understand the world through many such models of a variety of content domains sheds light on a number of problems in philosophy Horst first presents the standard view of cognitive architecture assumed in mainstream epistemology semantics truth theory and theory of reasoning He then explains the notion of a mental model as an internal surrogate that mirrors features of its target domain and puts it in the context of ideas in psychology philosophy of science artificial intelligence and theoretical cognitive science Finally he argues that the cognitive pluralist view not only helps to explain puzzling disunities of knowledge but also raises doubts about the feasibility of attempts to unify the sciences presents a model based account of intuitive judgments and contends that cognitive pluralism favors a reliabilist epistemology and a molecularist semantics Horst suggests that cognitive pluralism allows us to view rival epistemological and semantic theories not as direct competitors but as complementary accounts each an idealized model of different dimensions of evaluation **Speaking**

with Houses Michael Linzey, 2025-09-16 This book critically examines the concept of Being in Western philosophy and its manifestation in architecture The book traverses diverse cultural and historical contexts analysing five architectural works the Djoser Step Pyramid in ancient Egypt the Pantheon in imperial Rome the Tai an tea house in late medieval Japan the Te Tokanganui a Noho meeting house in colonial New Zealand and Mies van der Rohe s Seagram Building in modern New York Through these case studies it challenges Martin Heidegger s assertion that language is the house of Being proposing instead that Being is a construct specific to Western ontology By exploring architectural poiesis across various cultures the book reveals that the Western notion of Being is not a universal foundation for architectural creation Each examined structure embodies distinct cultural and philosophical principles such as the concept of m in Japanese tea houses which signifies neither Being nor non Being and the no Being tradition in M ori tikanga This comparative analysis underscores the diversity of architectural expressions and their underlying philosophies offering readers a nuanced understanding of how different cultures conceptualize existence and space This book is an invaluable resource for scholars in architecture philosophy and cultural studies Its interdisciplinary approach provides a comprehensive critique of Western metaphysical assumptions encouraging readers to reconsider the relationship between language being and architectural form By integrating architectural analysis with philosophical inquiry it fosters a deeper appreciation of cultural diversity in architectural practices and invites academics to explore alternative ontological perspectives in the built environment **Philosophical**
