The Politics of Uneven Development Richard F. Doner, 2009-02-09 Why do some middle income countries diversify their economies but fail to upgrade to produce world class products based on local inputs and technological capacities Why have the little tigers of Southeast Asia such as Thailand continued to lag behind the Newly Industrializing Countries of East Asia Richard Doner goes beyond political will by emphasizing institutional capacities and political pressures development challenges vary upgrading poses tough challenges that require robust institutional capacities Such strengths are political in origin They reflect pressures such as security threats and resource constraints which motivate political leaders to focus on efficiency more than clientelist payoffs Such pressures help to explain the political institutions veto players through which leaders operate Doner assesses this argument by analyzing Thai development historically in three sectors sugar textiles and autos and in comparison with both weaker and stronger competitors Philippines Indonesia Taiwan Brazil and South Korea

Automotive Engine Alternatives Robert L. Evans,2013-06-29 This book contains the proceedings of the International Symposium on Alternative and Advanced Automotive Engines held in Vancouver B C on August 11 and 12 1986 The

symposium was sponsored by EXPO 86 and The University of British Columbia and was part of the specialized periods program of EXPO 86 the 1986 world's fair held in Vancouver. Some 80 attendees were drawn from 11 countries representing the academic, automotive and large engine communities. The purpose of the symposium was to provide a critical review of the major alternatives to the internal combustion engine. The scope of the symposium was limited to consideration of combustion engines so that electric power for example was not considered. This was not a reflection on the possible contribution which electric propulsion may make in the future but rather an attempt to focus the proceedings more sharply than if all possible propulsion systems had been considered. In this way all of the contributors were able to participate in the sometimes lively discussion sessions following the presentation of each paper.
