Lyon,E. Christian Wells,2012-03-15 Global tourism is perhaps the largest scale movement of goods services and people in history Consequently it is a significant catalyst for

economic development and sociopolitical change While tourism increasingly accounts for ever greater segments of national economies the consequences of this growth for intercultural interaction are diverse and uncertain The proliferation of tourists also challenges classic theoretical descriptions of just what an economy is What are the commodities being consumed What is the division of labor between producers and clients in creating the value of tourist exchanges How do culture power and history shape these interactions What are the prospects for sustainable tourism How is cultural heritage being shaped by tourists around the world These critical questions inspired this volume in which the contributors explore the connections among economy sustainability heritage and identity that tourism and related processes makes explicit The volume moves beyond the limits of place specific discussions case studies and best practice examples Accordingly it is organized according to three overarching themes exploring dimensions of cultural heritage the multi faceted impacts of tourism on both hosts and guests and the nature of touristic encounters Based on ethnographic and archaeological research conducted in distinct locations the contributors conclusions and theoretical arguments reach far beyond the limits of isolated case studies Together they contribute to a new synthesis for the anthropology of tourism while simultaneously demonstrating how emerging theories of the economics of tourism can lead to the rethinking of traditionally non touristic enterprises from farming to medical occupations
