Help! I'm Teaching Middle School Science C. Jill Swango, Sally Boles Steward, 2003 Like your own personal survival guide Help! I'm Teaching Middle School Science is a nontechnical how to manual especially for first year teachers. But even veteran teachers can benefit from the plentiful ideas, examples and tips on teaching science the way middle schoolers learn best. The book covers all the basics: what to do on the first day of school including icebreaker activities, preparing safe and effective lab lessons, managing the classroom, working with in-school teams as well as parents. But its practical and encouraging approach doesn't mean it shortchanges the basics of effective pedagogy. You will learn how to handle cooperative learning and assessment, how to help students write effectively and the importance of modeling for early adolescents.

Children, Dogs and Education Mary Renck Jalongo, 2018-05-08 This book brings together authoritative information about the child-dog bond as it is manifested with family dogs, visiting therapy dogs and service dogs trained to assist children with disabilities. Despite the widely accepted view that participating in a dog's care and interacting with dogs in behaviorally healthy ways is a route to becoming responsible and compassionate, research on this complex dynamic is difficult to design, time-consuming to collect and challenging to analyze. This volume synthesizes theory, research and practice, bringing all to bear upon child-dog interactions in homes, schools, libraries and the community at large. Children, Dogs and Education serves as a handbook for a diverse group of adults who seek to build positive relationships between children and dogs: parents, families, professional dog trainers, teachers, librarians, mental health

professionals health care professionals and university faculty The study of interactions between human and nonhuman animals has captured the imagination of an international community of researchers from many different fields and professions Even though dogs are ubiquitous in the lives of most children studies of children s interactions with dogs in families and communities are lacking Most of the previous research on the human canine bond has focused on adolescents and adults or even when younger children are the focus it has tended to rely on parents to speak for children There are three features of this book that make it unique First it goes beyond exploring the child dog bond to examine additional important issues including children s concepts of responsible care their ability to interpret dogs behavioral cues and their ideas about canine behavioral issues training Second unlike most other work to date it represents children s voices through cases interviews and drawings Finally the contributors to this edited work use their collective wisdom to draw educational implications and suggest direction in preparing the next generation of dog guardians
