debate policies and institutional arrangements arising from the state's regulation and administration of culture in Ireland from 1800 to 2010. It traces the influence of precedent and practice developed under British rule in the nineteenth century on government in the 26 county Free State established in 1922, subsequently declared the Republic of Ireland in 1949. It demonstrates the enduring influence of the liberal principle of minimal intervention in cultural life on the approach of successive Irish governments to the formulation of cultural policy right up to the 1970s. From 1973 onwards, however, the state began to take a more interventionist and welfarist approach to culture. This was marked by increasing professionalization of the arts and heritage and a decline in state support for amateur and voluntary cultural bodies. That the state had a more expansive role to play in regulating and funding culture became a norm of cultural discourse. **Selling**

British Columbia Michael Dawson, 2004. Dawson's analysis draws on promotional pamphlets, newspaper advertisements and films as well as archival sources about government, civic and international tourism organizations. He argues that in order to understand the roots of the fully fledged consumer culture that developed in Canada, it is necessary to understand the connections between the 1930s, 1940s and the postwar era. He underlines the significance of the Depression and the Second World War, ostensibly periods of underconsumption. For the development of tourism promotion and consumerism in general. This cultural history will be welcomed by British Columbian and Canadian historians as well as scholars of consumer culture and tourism. Managing the Infosphere Stephen D. McDowell, Philip E. Steinberg, Tami K. Tomasello, 2008-08-13. Managing the Infosphere examines the global world of communications as a mobile space that overlaps uneasily with the world of sovereign territorial nation states. Drawing on their expertise in geography, political science, international relations and communication studies, the authors investigate specific policy problems encountered when international organizations, corporations and individual users try to manage a space that simultaneously contradicts and supports existing institutions and systems of governance, identity and technology. The authors argue that the roles of these systems in cyberspace cannot be fully understood unless they are seen as mutually constituting each other in specific historical structures, institutions and practices. With vision and insight, the authors look beyond the Internet to examine the entire networked world from cell phones and satellites to global tourism and business travel. **Nordic Perspectives on the Responsible Development of the Arctic:**
