This book is an interdisciplinary examination of several interconnecting aspects of migrant communities in the context of contemporary conflict and security. The book illustrates that within this globalised world migrants have become key actors living in the spaces between states as well as within them. Arguing that migrants and their descendants are vital and complex constituencies for the achievement of security in this global age, the volume uses a number of case studies including Palestinian, Sri Lankan, Irish and Somali diaspora communities to explore the different ways that such groups intersect with issues of security and how these attitudes and behaviours have evolved in the context of political transnationalism and the global economy. Comparative and econometric studies of migration can provide a wide lens but at times fail to capture the depth and complexity of these communities and attitudes within them. At the same time, empirically focused studies are often case specific and while rich in local detail lack comparative breadth or the ability to make connections and see irregularities across a number of contexts that might be of interest to scholars beyond that specific area. This book connects these literatures together more thoroughly. In particular, it demonstrates that political, cultural, economic and social factors all play important roles in helping us understand the actual and potential roles of migrant communities in conflict and the establishment of sustainable security within contemporary society. Lastly, given this context, the book seeks to examine the challenges and opportunities that exist for such a sustainable security strategy to be developed. This book will be of much interest to students of migration and diaspora communities, peace and conflict studies, security studies and ethnic conflict.

Globalisation, Migration And Health: Challenges And Opportunities Andre M N Renzaho, 2016-01-20

As globalisation gains momentum, international migration continues to divide opinion and polarise policy makers, politicians and advocates. This polarisation has been reflected in research and publications with pro-globalisation being pitched against anti-globalisation on the one hand and an explosion of research on migration on the other. This book examines the interaction between the two and their impact on health for the first time, highlighting the myths and realities from an international, multi-disciplinary perspective. The book starts with an examination of the complex and multifaceted aspects of the globalisation phenomenon and its impact on population displacement and health and concludes with a regional level analysis supported by country-specific examples. By highlighting common issues and differences across the globe, this book shows policy makers, political leaders and international committees on migration the specificities of global migration and good practice across the world. Particular attention is paid to practical policy responses and governance as well as legal frameworks to manage the dynamics of migration, engage international institutions and to maximise the benefits that internal and international migration bring.
