heart of society and makes up a significant proportion of the tourism market. Families may have one parent or two who may or may not be of different genders. This cutting edge book constructs a multidisciplinary perspective on family tourism by discussing various types of families, how parents and children influence travel behaviours now and in the future, and how family holidays may also be linked to stress. *Family Tourism: Multidisciplinary Perspectives* provides a compilation of issues from academic writers around the globe to provide a range of perspectives linked by a common theme of family tourism with a futures perspective. *Tourism* Stephen J. It has been portrayed by destinations and business operators and advocated by environmental groups as a sustainable activity and an alternative to whaling. However, in recent years, the sustainability of these activities has increasingly been questioned as research shows that repeated disturbance by boat traffic can severely disrupt critical behaviours of cetaceans in the wild. Bringing together contributions by international experts, this volume addresses complex issues associated with commercial whale watching, sustainable development and conservation of the global marine environment. It highlights widely expressed concerns for the failure of policy planning and management and pinpoints both long standing and emerging barriers to sustainable practice. Featuring numerous case studies, the book provides critical insights into the diverse socio cultural, political, economic and ecological contexts of this global industry, highlighting the challenges and opportunities that arise along the pathways to sustainability. *Handbook of Research on Global Hospitality and Tourism Management* Camillo, Angelo A., 2015-08-17 The tourism industry is a multi billion dollar enterprise with more people from all cultures and
