Problem-based Learning H. J. M. van Berkel,2010 Problem based learning PBL has excited interest among educators around
the world for several decades Among the most notable applications of PBL is the approach taken at the Faculty of Health
Medicine and Life sciences FHML at Maastricht University the Netherlands Starting in 1974 as a medical school the faculty
embarked on the innovative pathway of problem based learning trying to establish a medical training program which applied
recent insights of education which would be better adapted to the needs of the modern physician The medical school
currently part of the FHML can be considered as an established school where original innovations and educational changes
have become part of a routine The first book to bring this wealth of information together *Lessons from Problem based*
Learning documents those findings and shares the experiences of those involved to encourage further debate and refinement
of problem based learning in specific applications elsewhere and in general educational discussion and thought Each chapter
provides a description of why and what has been done in the Maastricht program followed by reflection on the benefits and
issues that have arisen for these developments The final section of the book examines the application of PBL in the future and
how it is likely to develop further *Chicago Schools Journal* ,1928 Study Guide for Psychology Don H.
