Evaluation of National and State Assessments of Educational Progress, 1999-01-23 Since the late 1960s the National  
Assessment of Educational Progress NAEP the nation s report card has been the only continuing measure of student

achievement in key subject areas Increasingly educators and policymakers have expected NAEP to serve as a lever for education reform and many other purposes beyond its original role Grading the Nation s Report Card examines ways NAEP can be strengthened to provide more informative portrayals of student achievement and the school and system factors that influence it The committee offers specific recommendations and strategies for improving NAEP s effectiveness and utility including Linking achievement data to other education indicators Streamlining data collection and other aspects of its design Including students with disabilities and English language learners Revamping the process by which achievement levels are set The book explores how to improve NAEP framework documents which identify knowledge and skills to be assessed with a clearer eye toward the inferences that will be drawn from the results What should the nation expect from NAEP What should NAEP do to meet these expectations This book provides a blueprint for a new paradigm important to education policymakers professors and students as well as school administrators and teachers and education advocates Academic Languageing

Models for Immigrant Students Keengwe, Jared, Onchwari, Grace, 2019-06-14 Standardized tests have been selected as a key assessment factor in expanding the academic achievement of the national student population. However, these tests position immigrant students at the risk of academic failure, leading education experts to search for new strategies and teaching models. *The Handbook of Research on Assessment Practices and Pedagogical Models for Immigrant Students* is a critical research publication that focuses on research-based pedagogical practices for teaching immigrant students. Edited by a prominent IGI Global editor, this book examines the latest professional development models and assessment practices of English learners (ELs). Covering essential topics such as second language acquisition (SLA), classroom management, teacher education, refugee resettlement programs, and more, this publication is a valuable resource for academicians, professionals, researchers, administrators, faculty, and classroom teachers as the social and academic needs of English language learners continue to present a challenge for many schools and teachers.

*Meeting the Challenges to Measurement in an Era of Accountability* Henry Braun, 2016-01-29 Under pressure and support from the federal government, states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves. The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests, such as in mathematics or English language arts, with a focus on grades 4-8. Teachers in these subject areas, however, constitute less than thirty percent of the teacher workforce in a district. Comparatively little has been written about the measurement of achievement in the other grades and subjects. This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas, with particular attention to their use in the evaluation of teachers and schools in all. It addresses traditional end-of-course tests as well as alternative measures such as portfolios, exhibitions, and student learning objectives. In each case, issues related to design and development, psychometric considerations, and validity challenges are covered from both a generic and a content-specific perspective. The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research-based applications of educational measurement and assessment. Edited by leading experts, these books are comprehensive and practical resources on the latest developments in the field.
